Scientific and Technical Aerospace Reports ,1986 **Enterprise Design, Operations, and Computing** Henderik A. Proper, Luise Pufahl, Dimka Karastoyanova, Marten van Sinderen, João Moreira, 2023-10-19 This book constitutes the refereed proceedings of the 27th International Conference on Enterprise Design Operations and Computing EDOC 2023 held in Groningen The Netherlands during October 30 November 3 2023 The 12 full papers included in this book were carefully reviewed and selected from 36 submissions They were organized in topical sections as follows Enterprise Modeling Enterprise Architecture Engineering Model Based Software Engineering Enterprise Analysis with Process Mining Process Improvement Engineering and Modeling in an Enterprise Context NASA Technical Memorandum ,1976 *IT and Manufacturing Partnerships* Jimmie Browne, Ramón Haendler Mas, O. Hlodversson, 1996 The theme of this book is the development of partnerships between manufacturing companies their suppliers and customers and the facilitating of these partnerships by information technology and telecommunications In the 1980s the emphasis in manufacturing was on integration within the

four walls of the manufacturing plant The main issues facing researchers and industrial practitioners at the time were CAD CAM integration integration of production planning and control systems the development of sophisticated computer driven manufacturing assembly and testing systems and their control through sophisticated shop floor control systems Today the emphasis has moved towards supply chain management integration of the supply chain through Electronic Data Interchange EDI and Just in Time JIT or Quick Response approaches and customer driven manufacturing This includes the integration of manufacturing and distribution logistics planning and control systems Consequently success for manufacturing companies in the 1990s requires closer collaboration with customers suppliers and distributors than in the past Information Technology and the emergence of a powerful global information infrastructure enable manufacturing industries throughout Europe to develop collaborative partnership across the value chain Successful collaboration is achieved by the sharing of information at all phases of the business cycle across the supply chain and across national and international boundaries The need to collaborate across the supply chain has particular consequences for small and medium sized manufacturing SMEs companies many of whom are compared and subassembly suppliers to the larger companies Indeed the collaboration between supplier SMEs and their large customers has in many cases gone beyond JIT supply of components based on orders delivered processed and frequently paid for using EDI technology and now extends to joint design and engineering activity Collaboration between manufacturing companies across the supply chain is therefore placing increasing pressure on the developers of the global information superhighway and on the developers of CAD and other engineering software to ensure compliance with emerging standards such as STEP in order to allow intercompany collaboration These are the issues which form the background of this book The book is aimed at those researchers and industrial practitioners interested in learning about recent progress in manufacturing systems research and application Mature results emerging from the ESPRIT IIM programme are presented Readers Manufacturing managers an engineers Quality process engineers IT suppliers vendors Academic researchers Technology transfer centres and Industrial associations

LEAN MANAGEMENT: THE LAUNCHPAD FOR GLOBALIZATION, INDUSTRIAL REVOLUTION AND EMPOWERMENT Dr. Suresh Sharma, 2021-03-01

Lean Manufacturing concept has brought new industrial revolution and the battle lines are clearly drawn It is traditional mass production versus the trim and tidy lean Enterprising Lean experts and past researchers plead Lean production is a superior way for humans to make things It provides better products in wider variety at lower cost It provides more challenging and fulfilling work for employees at every level The whole world should adopt lean production and as quickly as possible Henry Ford defined Lean Enterprising stating If it does not add value it is waste This concept was later adopted by Toyota as the core idea behind the famous Toyota Production System T P S The Toyota Production System is the foundation of many books on lean It is the story of Lean Production how Japan s secret weapons in the global auto wars later revolutionized western industries The concept of lean manufacturing was widely accepted A Standard S A E J 4000 1999 was also released to specify

Lean in detail The purpose of this book is to share the knowledge and experience gained through collaborative contribution with a wide range of readers including students managers entrepreneurs industrial leaders university professors and self learning professionals Implementation of lean practices mainly in automobile and engineering industries provide valuable insight Further the book describes how it can be applied to wider field of work including shipbuilding information technology environmental protection transportation services and performance management from human resource perspective My presentations on LEAN in conferences and published papers in international journals like Elsevier IEEE and David Publishing USA are also included to provide valuable inputs This book recommends the solution for immediate problems faced by industries and service sectors using lean principles and practices The generic but common and critical problems that are discussed in depth include economic crisis global competition scarce resources quality issues waste generation volatile market global warming and poor performance These issues have also been examined by the author in his other book Management Paradox Re examined as source of tension dilemma and contradiction Relevant tools and techniques that are addressed and applied include Kaizen Five S Visual Management Just in Time Kanban System One Piece Flow Single Minute Exchange of Die Total Productive Maintenance and Poka Yoke For a specific reason mistake proofing Poka Yoke has been elaborated in detail for exploring its effectiveness to add value in product and services This powerful lean tool took a long time to acquire its place in the list of popular tools because it challenged the effectiveness of statistical process control towards achieving zero defect The quantitative and qualitative approaches that have been selected and used based on the field of work and situation will be found interesting by research scholars Methods like correlation analysis test of hypothesis and analysis of variance ANOVA have been carried out using the quantitative technique Qualitative approach has been used for lean and sustainable transport system to understand people s belief perspective and experience This approach supported in handling the important issues of consent and confidentiality The book also presents the arguments on potential limitations of the lean manufacturing strategy on one hand and criticism on drifting definition of lean on other hand The book firmly suggests instant applicability of lean principles and practices in sectors like manufacturing and construction The way to apply lean in other sectors including ICT in conjunction with present practices like agile for knowledge to apply tools scrum for experience based self direction etc are recommended These sector specific practices are supported by lean principles but the book discovers that exclusively focusing on software development without considering upstream and downstream operations severely limit the benefits Therefore lean principles support agile and scrum and take much beyond software development The ideas and recommendations offered in this book can be used for further implementation of lean in a large number of organizations and different fields including MSME service providing industries healthcare construction management management education and for army reforms A leaner modern military is the need of the hour
