Nanostructured Materials for Next-Generation Energy Storage and Conversion Fan Li, Sajid Bashir, Jingbo Louise Liu, 2018-04-17 The energy crisis and pollution have posed significant risks to the environment transportation and economy over the last century Thus green energy becomes one of the critical global technologies and the use of nanomaterials in these technologies is an important and active research area This book series presents the progress and opportunities in green energy sustainability Developments in nanoscaled electrocatalysts solid oxide and proton exchange membrane fuel cells lithium ion batteries and photovoltaic techniques comprise the area of energy storage and conversion Developments in carbon dioxide CO₂ capture and hydrogen H₂ storage using tunable structured materials are discussed Design and characterization of new nanoscaled materials with controllable particle size structure shape porosity and band gap to enhance next generation energy systems are also included The technical topics covered in this series are metal organic frameworks nanoparticles nanocomposites proton exchange membrane fuel cell catalysts solid oxide fuel cell electrode design trapping of carbon dioxide and hydrogen gas storage

Electrochemical Energy Systems Artur Braun, 2018-12-03 This book is for anyone interested in renewable energy for a sustainable future of mankind Batteries fuel cells capacitors electrolyzers and solar cells are explained at the molecular level and at the power plant level in their historical development in their economical and political impact and social change Cases from geophysics and astronomy show that electrochemistry is not confined to the small scale Examples are shown and exercised

Diesel Engines - Current Challenges and Future Perspectives Hasan Koten, 2024-05-22 This book discusses the current technology and future status of diesel engines While gasoline engines are preferred for speed and jet engines diesel engines are widely used in vehicles and machinery that require torque such as ships trains tanks unmanned ariel vehicles UAVs and heavy duty vehicles Some recent research on global climate change has focused on obtaining zero carbon zero emissions and decarbonization via clean combustion technologies For this reason restrictive emission regulations have forced engine manufacturers and research centers to turn to different technologies to achieve clean combustion in diesel engines This book focuses on different combustion technologies from artificial intelligence applications in diesel engines to alternative fuels It discusses the roles of artificial intelligence in the design of diesel engines the use of different fuels in diesel engines and the effects of these on the performance and emission values of diesel engines Solving the challenge of hydrogen storage in hydrogen fed diesel engines will open a new era for internal combustion engines In particular the use of hydrogen fuel produced by the reaction of chemical ingredients with water in diesel engine cycles will have a significant impact on the industry This book which brings together the latest studies on clean combustion technologies is an interesting resource for both industry and research centers

Fuel Cells Detlef Stolten, Remzi C. Samsun, Nancy Garland, 2016-02-19 This ready reference is unique in collating in one scientifically precise and comprehensive handbook the widespread data on what is feasible and realistic in modern

fuel cell technology Edited by one of the leading scientists in this exciting area the short uniformly written chapters provide economic data for cost considerations and a full overview of demonstration data covering such topics as fuel cells for transportation fuel provision codes and standards The result is highly reliable facts and figures for engineers researchers and decision makers working in the field of fuel cells Social Research Bruce Curtis,Cate Curtis,2011-11-14 Original fresh and relevant this is a theoretically informed practical guide to researching social relations The text provides a mixed methods approach that challenges historical divisions between quantitative and qualitative research It adopts a multidisciplinary approach to social science research drawing from areas such as sociology social psychology and social anthropology Explicitly addressing the concerns of emergent researchers it provides both a how to account of social research and an understanding of the main factors that contextualize research by discussing why do social scientists work this way Throughout the twelve comprehensive chapters procedural how to accounts and contextual why do issues are usefully applied to major themes and substantive questions These key themes include 1 Research design 2 The practices of research and emergent researchers Beyond ontology epistemology and methodology 3 The impact of technology on research 4 Putting the research approach in context A superb teaching text this book will be relished by lecturers seeking an authoritative introduction to social research and by students who want an accessible enriching text to guide and inspire them

BRAZILIAN X CHINESE AUTOMOBILE INDUSTRY: PERSPECTIVE OF GROWTH AND DEVELOPMENT FOR SOUTH AMERICA 2010/2012 Xinye Kang,Eduardo Bomfim Machado, ABSTRACT Since 1992 when the president Derrnando Collor de Melo opened the Brazilian automobile market to the international products the share of foreign brands in this market has increased Nowadays the growth of the members of the BRICS in the international automobile market has become more visible purchase or in the manufacturing either the numbers of MERCOSUR are quite relevant due to the strength of the internal market Nevertheless China might be a competitive force due to its industrial development and exportations This research has searched for further information and the data from the sectors in the Brazilian and Chinese automobile markets and has analyzed the information collected in order to build a scenario that can be used by the Brazilian and Chinese students and by the firms that work in the sector as well **Advances in Renewable Energy and Electric Vehicles**
