Tillich Friedrich Schleiermacher and the American pragmatists John Dewey and Charles Sanders Pierce From Tillich he takes the notion of religion art and morality as symbol and the notion that religion is the substance of culture and culture the form of religion Thus theology is symbolic engagement with cultural forms and Neville explores the ways that such engagement occurs among various religious traditions One of the most important tasks in theology is to devise ways of testing correcting or affirming claims that we had been unable to question before This book will argue that system in theology is not merely correlating assertions but rather building perspectives from which we can render the various parts of theology vulnerable for assessment In fact one of the unique features of this book is its engagement with other religions Such dialogue has been a feature of Neville s work from the beginning Theology as Symbolic Engagement breaks the boundaries of systematic theology and moves away from the static character that characterizes such enterprises from Barth onward Instead Neville s book showcases the dynamic character of all theology The hallmark of this entire project is its effort to show theology to be hypothetical and to make it vulnerable to correction

creationism and scientific theories of the origin of the universe has been an ongoing and contentious one On one side we have the belief in a divine Creator who is responsible for the creation of the world in six days as described in the Bible On the other side we have scientific theories such as the Big Bang which posits that the universe began with a massive explosion around 13.8 billion years ago For those who adhere to the belief in a Creator the concept of a six day creation holds immense significance This belief is rooted in faith and is a fundamental tenet of many religious traditions The idea that a higher power carefully constructed the universe day by day is a source of comfort and meaning for many people Some may argue that the Big Bang theory is nothing more than science fiction or science madness dismissing it as a fanciful and unsubstantiated idea
