WARNING

DO NOT FLY YOUR CLOUD RIDER™ IN FOUL WEATHER!

FLIGHT PREPARATION

- Verify that there are 4 "AA" batteries inside the remote control unit and the Cloud Rider™ has been fully charged.
 - Make sure your Cloud Rider™ and controller are both turned on.
 - Make sure to be in a large space with an open radius of at least 50 feet.
 - Make sure the empty space has no obstacles. Set your Cloud Rider™ on a clean flat surface before take-off.
- DO NOT ATTEMPT TO FLY YOUR CLOUD RIDER™ IF THERE IS RAIN, SNOW, HEAVY WINDS, THUNDER OR LIGHTNING OUTDOORS. IT COULD DAMAGE YOUR PRODUCT AND POSSIBLY EVEN CAUSE BODY HARM.**

SYNCING YOUR CLOUD RIDER™

Important! When syncing your Cloud Rider™ quadcopter with the controller always make sure that the quadcopter is on a flat level surface and that your digital trim settings are in the center position. This insures that the 6 Axis gps is properly programmed to mimic your trim settings. Your Cloud Rider™ utilizes an automatic 2.4G channel selection system that allows up to 8 people to fly side by side in the same wireless range with no interference.

Syncing your aircraft:

1. Before starting, make sure that the power on your controller is in the OFF position and the Cloud Rider™ wire leads are not connected. Make sure that there are no other 2.4GHz devices in the area as well.
2. Open the battery compartment. Connect the battery wire lead to the Cloud Rider™ lead and set it down on a flat surface. The LED indicator lights of the Cloud Rider™ should begin to flash (see diagram 5). Insert battery and close compartment.
3. Put the remote controller and Cloud Rider™ in same orientation before turn on both unit, (see diagram 6). It locks the flying orientation during headless mode.
4. Turn ON the remote, you will hear a series of beeps, the Cloud Rider™s flashing LED lights should change to solid, pull the throttle on the left all the way up then all the way down. Your controller and the quadcopter should now be successfully synced, if not, repeat above steps (see diagram 7).

FLYING TIPS

- It is recommended that you operate the Cloud Rider™ outdoors in a wide space. The ideal space should have a 300-foot radius.
- Parental guidance or adult supervision is suggested at all times.
- If you are flying the Cloud Rider™ with others, make sure all operators are behind you.
- For best performance, it is recommended that you operate the Cloud Rider™ in zero wind conditions. Wind can greatly affect the performance of the aircraft or cause injury.
