USAFE, a Primer of Modern Air Combat in Europe Michael Skinner, 1983 **USAFE in the 1980s** Adrian Symonds, 2020-10-15 The lavishly illustrated story of the United States Air Forces in Europe in the 1980s Take a step inside the day to day operations Battlefield Air Interdiction In The 1973 Middle East War And Its Significance To NATO Air Operations Major Bruce A. Brant, 2015-11-06 This study is a historical analysis of battlefield air interdiction during the 1973 Middle East War Its purpose is to draw conclusions based on the historical findings about the best way to employ BAI in the air land battle Although the conclusions come from a Middle East War over ten years ago they are examined in terms of the NATO environment The tactical and technological developments of both Arab and Israeli air forces during the years 1967 1973 are examined in order to explain how both sides arrived at the doctrine they employed in the 1973 War The Arabs established an intensive air defense network to deny the Israelis their strongest and most flexible weapons system The Israelis believed that their Air Force would destroy Arab ground forces as it did in 1967 The confrontation of both doctrines had significant implications for the ground forces particularly the relative value assigned close air support and battlefield air interdiction The study concludes that close air support is not the best use of air assets in a high density air defense environment Battlefield air interdiction is more effective to the operational ground commander Localized control of air defense systems is needed to allow the use of air to ground assets The final conclusion is that suppression of enemy air defense systems is a joint service responsibility **Military Review** ,1983 **Quarterly Review of Military Literature** ,1983 **Air Defense Artillery** ,1983 **United States Air Force and Its Antecedents** James T. Controvich, Martin Gordon, 2004-06-24 This expanded and revised edition of the bibliography originally compiled for the United States Air Force Historical Research Agency is the most comprehensive listing of unofficial published histories of the United States Air Force and its antecedents It covers the air force from its genesis as the US Army Signal Corps Aviation Section to the present These titles are a rich source of information for anyone interested in the history of combat and peacetime operations of the Air Force Researchers and libraries will find the organization of titles easy to use Entries include private sponsored or unofficial histories often written by the unit historian personal narratives purely photographic or pictorial histories route of battle maps published or printed rosters officially produced titles This is an indispensable resource for military aviation historians libraries with strong collections in military and air force history and unit history collectors It is also of special interest to genealogists as many unit histories contain rosters and photos of personnel **Infantry** ,1984
