

AN/PRC-117G RADIO

AN/PRC-117G & BROADBAND GLOBAL AREA NETWORK RADIOS

The AN/PRC-117G (Falcon III) manpack networking radio has been certified by the National Security Agency, the Joint Test and Evaluation Lab, and the Joint Interoperability Test Command. The AN/PRC-117G has a capability that allows the warfighter access to secure Internet protocol (IP) data at on-air rates up to five megabits per second using its Type-1 certified, software communications architecture-compliant, software-defined architecture.

This radio has reliable and secure access to data-intensive applications such as streaming video and biometrics while simultaneously meeting legacy narrowband interoperability requirements and future JTRS networking capabilities. It has significant size, weight, and power advantages over legacy radios and provides space for more sustained expeditionary operations.

The AN/PRC-117G provides the capability of wideband networking through the Harris Advanced Wideband Networking Waveform (ANW2) and the Soldier Radio Waveform (SRW).

The radio also includes SINGARS, HAVEQUICK II, the Harris HPW, UHF DAMA SATCOM, and programmable encryption. Because of its compact nature, the AN/PRC-117G fits into all standard SINGARS installations.
