Advances in Brain Inspired Cognitive Systems Jinchang Ren,Amir Hussain,Jiangbin Zheng,Cheng-Lin Liu,Bin Luo,Huimin Zhao,Xinbo Zhao,2018-10-05 This book constitutes the refereed proceedings of the 9th International Conference on Advances in Brain Inspired Cognitive Systems BICS 2018 held in Xi an China in July 2018 The 83 papers presented in this volume were carefully reviewed and selected from 137 submissions The papers were organized in topical sections named neural computation biologically inspired systems image recognition detection tracking and classification data analysis and natural language processing and applications

PCM—CMM2023: Theories, Models and Simulations of Complex Physical Systems Eugeniusz Świtoński,Arkadiusz Mężyk,Śławomir Kciuk,Roman Szewczyk,2024-10-31 The idea of organizing the Polish Congress of Mechanics was born in 2005 among members of the Polish Society of Theoretical and Applied Mechanics The first Congress has been organized in 2007 In 2013 the organization of the Polish Congress of Mechanics was included in the statutory tasks of the Polish Society of Theoretical and Applied Mechanics Referring to the splendid tradition of Polish Theoretical and Applied Mechanics the Congress has become one of the most important international scientific conventions representing this domain of science and gathering every 4 years about 500 600 specialists who deal with the issues of mechanics and mechanical engineering in a broad sense The organization of the Congress allows for the connection of many scientific communities researchers and engineers from various universities faculties research centers and institutions Such scientific meeting is an excellent place for presentation discussion and dissemination of new achievements and ideas relating to the theoretical foundations as well as practical

applications of mechanics The Congress presents the current state of the art research in all disciplines of classical and quantum mechanics solid and fluid mechanics computational mechanics applied mechanics and physics as well as structural mechanics and engineering

Computer Aided Pharmaceutics and Drug Delivery Vikas Anand Saharan, 2022-05-30

This book examines the role of computer assisted techniques for discovering designing optimizing and manufacturing new effective and safe pharmaceutical formulations and drug delivery systems The book discusses computational approaches statistical modeling and molecular modeling for the development and safe delivery of drugs in humans The application of concepts of QbD Quality by Design DoE Design of Experiments artificial intelligence and in silico pharmacokinetic assessment simulation have been made a lot easier with the help of commercial software and expert systems This title provides in depth knowledge of such useful software with illustrations from the latest researches The book also fills in the gap between pharmaceutics and molecular modeling at micro meso and macro scale by covering topics such as advancements in computer aided Drug Design CADD drug polymer interactions in drug delivery systems molecular modeling of nanoparticles and pharmaceutics bioinformatics This book provides abundant applications of computers in formulation designing and characterization are provided as examples case studies and illustrations Short reviews of software databases and expert systems have also been added to culminate the interest of readers for novel applications in formulation development and drug delivery Computer aided pharmaceutics and drug delivery is an authoritative reference source for all the latest scholarly update on emerging developments in computer assisted techniques for drug designing and development The book is ideally designed for pharmacists medical practitioners students and researchers

AI for Robotics Alishba Imran, Keerthana Gopalakrishnan, 2025-05-02

This book approaches robotics from a deep learning perspective Artificial intelligence AI has transformed many fields including robotics This book shows you how to reimagine decades old robotics problems as AI problems and is a handbook for solving problems using modern techniques in an era of large foundation models The book begins with an introduction to general purpose robotics how robots are modeled and how physical intelligence relates to the movement of building artificial general intelligence while giving you an overview of the current state of the field its challenges and where we are headed The first half of this book delves into defining what the problems in robotics are how to frame them as AI problems and the details of how to solve them using modern AI techniques First we look at robot perception and sensing to understand how robots perceive their environment and discuss convolutional networks and vision transformers to solve robotics problems such as segmentation classification and detection in two and three dimensions The book then details how to apply large language and multimodal models for robotics and how to adapt them to solve reasoning and robot control Simulation localization and mapping and navigation are framed as deep learning problems and discussed with recent research Lastly the first part of this book discusses reinforcement learning and control and how robots learn via trial and error and self play The second part of this book is concerned with applications of robotics

in specialized contexts You will develop full stack knowledge by applying the techniques discussed in the first part to real world use cases Individual chapters discuss the details of building robots for self driving industrial manipulation and humanoid robots For each application you will learn how to design these systems the prevalent algorithms in research and industry and how to assess trade offs for performance and reliability The book concludes with thoughts on operations infrastructure and safety for data driven robotics and outlooks for the future of robotics and machine learning In summary this book offers insights into cutting edge machine learning techniques applied in robotics along with the challenges encountered during their implementation and practical strategies for overcoming them What You Will Learn Explore ML applications in robotics covering perception control localization planning and end to end learning Delve into system design and algorithmic and hardware considerations for building efficient ML integrated robotics systems Discover robotics applications in self driving manufacturing and humanoids and their practical implementations Understand how machine learning and robotics benefit current research and organizations Who This Book Is For Software and AI engineers eager to learn about robotics seasoned robotics and mechanical engineers looking to stay at the cutting edge by integrating modern AI and investors executives or decision makers seeking insights into this dynamic field AI in Material Science Syed Saad,Syed Ammad,Kumeel Rasheed,2024-07-26 This book explores the transformative impact of artificial intelligence on material science and construction practices in the Industry 4 0 landscape It enquires into AI history and applications examining material optimization smart materials and AI in construction Covering automation robotics and AI assisted design the book provides insights into ethical considerations and future trends A modern reference for scholars and professionals it bridges academia and practical applications in the dynamic intersection of AI and materials science
