

# USER'S MANUAL

## **1.0 GENERAL INFORMATION**

General Information section explains in general terms the system and the purpose for which it is intended.

### **1.1 System Overview**

ArboWebForest is application, which allows collecting information about forest plots. The application provides electronic version of form used in collecting plot information. The application saves data collected to database. Its operational status is under development. ArboWebForest operates on mobile devices with Android operating system.

### **1.2 Organization of the Manual**

The user's manual consists of five sections: General Information, System Summary, Getting Started, Using The System, and Reporting.

General Information section explains in general terms the system and the purpose for which it is intended.

System Summary section provides a general overview of the system. The summary outlines the uses of the system's hardware and software requirements, system's configuration, user access levels and system's behavior in case of any contingencies.

Getting Started section explains how to get ArboWebForest and install it on the device. The section presents briefly system menu.

Using The System section provides a detailed description of system functions.

Reporting section describes in what way information collected by the application are presented and how to access the information.

**Introduction to Finite Element Analysis Using MATLAB® and Abaqus**

Amar Khennane,2013-06-10 There are some books that target the theory of the finite element while others focus on the programming side of things Introduction to Finite Element Analysis Using MATLAB and Abaqus accomplishes both This book teaches the first principles of the finite element method It presents the theory of the finite element method while maintaining a balance between its mathematical formulation programming implementation and application using commercial software The computer implementation is carried out using MATLAB while the practical applications are carried out in both MATLAB and Abaqus MATLAB is a high level language specially designed for dealing with matrices making it particularly suited for programming the finite element method while Abaqus is a suite of commercial finite element software Includes more than 100 tables photographs and figures Provides MATLAB codes to generate contour plots for sample results Introduction to Finite Element Analysis Using MATLAB and Abaqus introduces and explains theory in each chapter and provides corresponding examples It offers introductory notes and provides matrix structural analysis for trusses beams and frames The book examines the theories of stress and strain and the relationships between them The author then covers weighted residual methods and finite element approximation and numerical integration He presents the finite element formulation for plane stress strain problems introduces axisymmetric problems and highlights the theory of plates The text supplies step by step procedures for solving problems with Abaqus interactive and keyword editions The described procedures are implemented as MATLAB codes and Abaqus files can be found on the CRC Press website
