**What Should Legal Analysis Become?** Roberto Mangabeira Unger, 1996-06-17 Unger criticizes the dominant rationalizing style of legal doctrine with its obsessional focus upon adjudication and its urge to suppress or contain conflict or contradiction in law. He shows how we can turn legal analysis into a way of talking about the alternative institutional futures of a democratic society. The programmatic proposals of Unger's *Politics* are here placed within a wider field of possibilities.

*Carl Schmitt* William E. Scheuerman, 1999 This is the first full length study in English of twentieth century Germany's most influential authoritarian right wing political theorist Carl Schmitt that focuses on the central place of his attack on the liberal rule of law. This is also the first book in any language to devote substantial attention to Schmitt's subterranean influence on some of the most important voices in political thought: Joseph Schumpeter, Friedrich A. Hayek and Hans Morgenthau in the United States after 1945. Visit our website for sample chapters.

*Affective legal analysis* Frank Fleerackers, Josef Heinz Müller, Wilfried Burkhardt, 2019 Indeed if the legal field is to be understood as instrumental to democracy's cohabitation of individuals, research on dispute resolution remains pre-eminent as a means to understand how individual views differ and how different views can be overcome. As a central part of conflict analysis, such research would assist an interdisciplinary quest for a dynamic understanding of democracy and law. It would focus on how different individuals with different conceptions of the good can live together in their community in their world. Scientific research in the fields of communication, economics, psychology, history, political theory and philosophy to name but a few would side with legal theory in a shared ambition to analyze the way individuals are affected by their views as well as by their institutions in order to provide society with a dynamic means to solve conflicts and enhance citizenship or legal awareness. Such research necessarily coincides with empathy-oriented education directed towards an understanding of different conflict positions and the related comprehensive or non-comprehensive views affecting them. An affective education analyzing all affective mechanisms of societal or interpersonal disputes and their legal or alternative resolution. A clinical education offering an interactive simulation with regard to these positions and their affective impact demonstrating how individual views continuously affect the positions taken, how disputes are affected by the legal or other institutions that attempt to solve them and how the effectiveness of legal or other solutions to the conflict at hand depends on a practice of affective legal analysis. Thus legal and civic education by way of affective narration and clinical simulation join affective legal analysis in its endeavor to provide society with a similarly affective and non-rationalizing approach of legal awareness. **External Relations Law of the European Community** Rasmussen Holdgaard, 2008-01-01 External Relations Law of the European Community begins by noting two common characteristics of legal analyses in the field of EU external relations First most legal analyses assume that EC external relations law cannot be studied or applied without a constant awareness of the underlying political dynamics Yet the same analyses fail to explain how these dynamics are to be understood assessed and systematically applied This pragmatic outlook reduces the importance and value of a self reflective rational and coherent legal language Second most legal analyses tend to focus only on n

The Future of Liberation Theology Ivan Petrella, 2017-03-02 The Future of Liberation Theology envisions a radical new direction for Latin American liberation theology One of a new generation of Latin American theologians Ivan Petrella shows that despite the current dominance of end of history ideology liberation theologians need not abandon their belief that the theological rereading of Christianity must be linked to the development of historical projects models of political and economic organization that would replace an unjust status quo In the absence of historical projects liberation theology currently finds itself unable to move beyond merely talking about liberation toward actually enacting it in society Providing a bold new interpretation of the current state and potential future of liberation theology Ivan Petrella brings together original research on the movement with developments in political theory critical legal theory and political economy to reconstruct liberation theology s understanding of theology democracy and capitalism The result is the recovery of historical projects thus allowing liberation theologians to once again place the reality of liberation and not just the promise at the forefront of their task

*Philosophy of International Law* Anthony Carty, 2007-03-11 A fundamental challenge to the foundations of the discipline of international law This book offers an internal critique of the discipline of international law whilst showing the necessary place for philosophy within this

subject area By reintroducing philosophy into the heart of the study of international law Anthony Carty explains how traditional philosophy has always been an integral part of the discipline However this has been driven out by legal positivism which has in turn become a pure technique of law He explores the extent of the disintegration and confusion in the discipline and offers various ways of renewing philosophical practice A range of approaches are covered post structuralism neo Marxist geopolitics social democratic constitutional theory and existential phenomenology encouraging the reader to think afresh about how far to bring order to or find order in contemporary international society      **Cultural Analysis, Cultural Studies, and the Law** Austin D.
