Pure Love, Pure Poetry, Pure Prayer Peter J. Gorday, 2018-09-14 By the time of his death in 1933 Henri Bremond priest and member of the elite Académie française had established himself in France and increasingly in England and the United States as a distinguished historian of Christian spirituality and as a Catholic modernist who helped to shake the church out of its dogmatic slumbers by embracing pure love artistic poetic expression and mystical prayer as the privileged manifestations of spiritual truth Drawing on substantial new scholarship in France that has resuscitated and reinterpreted Bremond's work for our own times and that sees Bremond as an important precursor of current trends in literary interpretation as well as spirituality Gorday surveys the entirety of Bremond's corpus of writing setting his work in its context of his personal struggles as well as the wider setting of French historical and cultural development

Your

Kin-dom Come William Thompson-Uberuaga, 2018-05-16 So many Christians pray the Lord's Prayer. It is almost second nature. This book is meant to help these people pray it more deeply and lovingly. Ecumenical and even striving to be global in nature, this book explores what the Scriptures teach us about this prayer, how the Christian tradition has approached this prayer in its long history, and how many of our contemporary concerns challenge the way we can pray this prayer, and also how the prayer can provide insights for those same concerns. People of all persuasions, believers and nonbelievers, and followers of the world's great religions will also find many of their concerns given serious consideration in this book. If you think nothing new can be said about the Our Father, this book may surprise you. Practical Wisdom Mario De Caro, Maria Silvia Vaccarezza, 2021-06-28 Featuring original essays from leading scholars in philosophy and psychology, this volume investigates and rethinks the role of practical wisdom in light of the most recent developments in virtue theory and moral, social, and developmental psychology. The concept of phronesis has long held a prominent place in the development of Aristotelian virtue ethics and moral education. However, the nature and development of phronesis is still in need of investigation, especially because of the new insights that in recent years have come from both philosophy and science. The essays in this volume contribute to the debate about practical wisdom by elucidating its role in empirical psychology and advancing important new research questions. They address various topics related to practical wisdom and its development, including honesty, ecocentric phronesis, social cognitive theory, practical wisdom in limited information contexts, Whole Trait Theory, skill models, the reciprocity of virtue, and challenges from situationism. Practical Wisdom will interest researchers and advanced students working in virtue ethics, moral psychology, and moral education. **Mindfulness for Educational Leadership in the 21st Century** Elizabeth Nakayiza RSCJ (Ph.D.), 2016-04-27 This book proposes a method for making educational systems and their curriculum leaderships in Sub-Saharan Africa, particularly Uganda, relevant, functional, and generative in the current unfolding of a fast-paced, technology-driven future that prompts questions about educational leadership in a society where many traditional educational systems are failing. The book poses the following question: What might constitute effective leadership in our heightened global nexus of realities often described as globalization? Nonhuman technologies are moving people away from connections that once strengthened human relationships and fostered collective actions. Too many workplace pressures and demands cause educational leaders to function on autopilot without involving others in the process of mindful leadership of educational reform. Focusing on mindfulness, its application in different educational settings, and its advantages for educational leadership, this book argues that contemporary meditation practices and their benefits can inform effective, successful twenty-first-century leadership practices in Africa, particularly Uganda. It draws on numerous theories from literature in the fields of business and management, medicine, psychology, theology, and the social and behavioral sciences. The selected theories represent the growing research grounded in contemporary thoughts on leadership epistemology with inclination toward the mindfulness that grows out of regular practice of meditation. The book

concludes with the argument that collective mindful educational leadership emerges when all stakeholders are able to participate in the leadership of their institution or school and contribute to the entire systems development. If practiced regularly, mindfulness would conduce to healthier collaborative behavior that would markedly improve Ugandan and other African educational systems. This kind of mindful leadership requires each stakeholder to lead from inside the self and interconnection with others in a profound way. This means leading by listening attentively and intently and embracing one another's voice nonjudgmentally for the common good.
