But their happy middle class world a life of education work and comfort implodes when their country is engulfed in war and the Taliban rises to power. Mahmoud a civil engineer becomes a target of the new fundamentalist regime and is murdered. Forced to flee Kabul with her three children Fereiba has one hope to survive she must find a way to cross Europe and reach her sister's family in England. With forged papers and help from kind strangers they meet along the way Fereiba makes a dangerous crossing into Iran under cover of darkness. Exhausted and brokenhearted but undefeated Fereiba manages to smuggle them as far as Greece. But in a busy market square their fate takes a frightening turn when her teenage son Saleem becomes separated from the rest of the family. Faced with an impossible choice Fereiba pushes on with her daughter and baby while Saleem falls into the shadowy underground network of undocumented Afghans who haunt the streets of Europe's capitals. Across the continent Fereiba and Saleem struggle to reunite and ultimately find a place where they can begin to reconstruct their lives.

Ball, 2022-07-20. The Story of the Heavens is the title of our book. We have indeed a wondrous story to narrate and could we tell it adequately it would prove of boundless interest and of exquisite beauty. It leads to the contemplation of grand phenomena in nature and great achievements of human genius. Let us enumerate a few of the questions which will be naturally asked by one who seeks to learn something of those glorious bodies which adorn our skies. What is the Sun how hot how big and how distant. Whence comes its heat. What is the Moon. What are its landscapes like. How does our satellite move. How is it related to the earth. Are the planets globes like that on which we live. How large are they and how far off. What do we know of the satellites of Jupiter and of the rings of Saturn. How was Uranus discovered. What was the intellectual triumph which brought the planet Neptune to light. Then as to the other bodies of our system what are we to say of those mysterious objects the comets. Can we discover the laws of their seemingly capricious movements. Do we know anything of their nature and of the marvelous tails with which they are often decorated. What can be told about the shooting stars which so often dash into our atmosphere and perish in a streak of splendor. Such are a few of the questions which occur when we ponder on the mysteries of the heavens. *The Book of Knowledge* Arthur Mee, 1911. **The Story of the Heavens** Robert Stawell
