While We Were Sleeping Success Stories In Injury And Violence Prevention:

While We Were Sleeping David Hemenway, 2009-05-04 Public health has made our lives safer often behind the scenes without our knowledge that is while we were sleeping In more than sixty success stories this book powerfully illuminates how public health works It also profiles dozens of individuals who have made important contributions to safety and health in a range of social arenas Highlighting examples from the United States and other countries While we were sleeping will inform a wide audience of readers about what public health actually does and at the same time will inspire a new generation to make the world a safer place

While We Were Sleeping David Hemenway, 2009-05-04 Public health has made our lives safer but it often works behind the scenes without our knowledge that is while we are sleeping This book powerfully illuminates how public health works with more than sixty success stories drawn from the area of injury and violence prevention It also profiles dozens of individuals who have made important contributions to safety and health in a range of social arenas Highlighting examples from the United States as well as from other countries While We Were Sleeping will inform a wide audience of readers about what public health actually does and at the same time inspire a new generation to make the world a safer place

Hospital-based Injury and Violence Prevention Programs Christy Adams, Glen Tinkoff, 2023-01-16 This book offers the first comprehensive insight into hospital based injury and violence prevention programs and describes a public health approach for the integration of population based injury prevention into trauma centers This book meets the need for a public health informed approach as a majority of hospital based injury and violence prevention programs are positioned within hospital systems driven by patient centered acute care models Significant variability in administration staffing and reimbursement structures across trauma centers has historically hindered standardization of injury prevention program structure and the role of the injury prevention professional Topics in the book include the history and development of hospital based programs the need and process for developing data driven and evidence based injury prevention interventions building trauma center capacity for outreach through partnerships developing prevention efforts using trauma informed care approach community based research and program evaluation and the role of advocacy in injury and violence prevention The multidisciplinary team of authors offers a collaborative approach to the implementation and development of Hospital based Injury and Violence Prevention Programs which will serve acute care nurses trauma program managers hospital administrators trauma surgeons hospital based injury prevention professionals and local public health professionals

Injury Research Guohua Li, Susan P. Baker, 2012-01-06 Injury is recognized as a major public health issue worldwide In most countries injury is the leading cause of death and disability for children and young adults age 1 to 39 years Each year in the United States injury claims about 170 000 lives and results in over 30 million emergency room visits and 2 5 million hospitalizations Injury is medically defined as organ tissue damages inflicted upon oneself or by an external agent either accidentally or deliberately Injury encompasses the undesirable consequences of a

wide array of events such as motor vehicle crashes poisoning burns falls and drowning medical error adverse effects of drugs suicide and homicide The past two decades have witnessed a remarkable growth in injury research both in scope and in depth To address the tremendous health burden of injury morbidity and mortality at the global level the World Health Organization in 2000 created the Department of Injury and Violence Prevention which has produced several influential reports on violence traffic injury and childhood injury The biennial World Conference on Injury Control and Safety Promotion attracts a large international audience and has been successfully convened nine times in different countries In the United States the National Center for Injury Prevention and Control became an independent program of the federal Centers for Disease Prevention and Control in 1997 Since then each state health department has created an office in charge of injury prevention activities and over a dozen universities have established injury control research centers This volume will fill an important gap in the scientific literature by providing a comprehensive and up to date reference resource to researchers practitioners and students working on different aspects of the injury problem and in different practice settings and academic fields

Social and Economic Costs of Violence National Research Council, Institute of Medicine, Board on Global Health, Forum on Global Violence Prevention, 2012-02-09 Measuring the social and economic costs of violence can be difficult and most estimates only consider direct economic effects such as productivity loss or the use of health care services Communities and societies feel the effects of violence through loss of social cohesion financial divestment and the increased burden on the healthcare and justice systems Initial estimates show that early violence prevention intervention has economic benefits The IOM Forum on Global Violence Prevention held a workshop to examine the successes and challenges of calculating direct and indirect costs of violence as well as the potential cost effectiveness of intervention

Gun Violence and Mental Illness Liza H. Gold, Robert I. Simon, 2015-11-17 Perhaps never before has an objective evidence based review of the intersection between gun violence and mental illness been more sorely needed or more timely Gun Violence and Mental Illness written by a multidisciplinary roster of authors who are leaders in the fields of mental health public health and public policy is a practical guide to the issues surrounding the relation between firearms deaths and mental illness Tragic mass shootings that capture headlines reinforce the mistaken beliefs that people with mental illness are violent and responsible for much of the gun violence in the United States This misconception stigmatizes individuals with mental illness and distracts us from the awareness that approximately 65% of all firearm deaths each year are suicides This book is an apolitical exploration of the misperceptions and realities that attend gun violence and mental illness The authors frame both pressing social issues as public health problems subject to a variety of interventions on individual and collective levels including utilization of a novel perspective evidence based interventions focusing on assessments and indicators of dangerousness with or without indications of mental illness Reader friendly well structured and accessible to professional and lay audiences the book Reviews the epidemiology of gun violence and its relationship to mental illness exploring what we

know about those who perpetrate mass shootings and school shootings Examines the current legal provisions for prohibiting access to firearms for those with mental illness and whether these provisions and new mandated reporting interventions are effective or whether they reinforce negative stereotypes associated with mental illness Discusses the issues raised in accessing mental health treatment in regard to diminished treatment resources barriers to access and involuntary commitment Explores novel interventions for addressing these issues from a multilevel and multidisciplinary public health perspective that does not stigmatize people with mental illness This includes reviews of suicide risk assessment increasing treatment engagement legal social and psychiatric means of restricting access to firearms when people are in crisis and when appropriate restoration of firearm rights Mental health clinicians and trainees will especially appreciate the risk assessment strategies presented here and mental health public health and public policy researchers will find *Gun Violence and Mental Illness* a thoughtful and thought provoking volume that eschews sensationalism and embraces serious scholarship

Hurt Catherine Musemeche, MD, 2016-09-06 Trauma is a disease of epidemic proportions that preys on the young killing more Americans up to age thirty seven than all other afflictions combined Every year an estimated 2.8 million people are hospitalized for injuries and more than 180,000 people die We take for granted that no matter how or where we are injured someone will call 911 and trained first responders will show up to insert IVs stop the bleeding and swiftly deliver us to a hospital staffed by doctors and nurses with the expertise necessary to save our lives None of this happened on its own Told through the eyes of a surgeon who has flown on rescue helicopters resuscitated patients in trauma centers in Houston and Chicago and operated on hundreds of trauma victims of all ages Hurt takes us on a tour of the advancements in injury treatment from the battlefields of the Civil War to the state of the art trauma centers of today

Reducing Gun Violence in America Daniel W. Webster, Jon S. Vernick, 2013-01-25 The staggering toll of gun violence which claims 31,000 U.S. lives each year is an urgent public health issue that demands an effective evidence based policy response The Johns Hopkins University convened more than 20 of the world's leading experts on gun violence and policy to summarize relevant research and recommend policies that are both constitutional and have broad public support Collected for the first time in one volume this reliable empirical research and legal analysis will help lawmakers opinion leaders and concerned citizens identify policy changes to address mass shootings along with the less publicized gun violence that takes an average of 80 lives every day Selected recommendations include Background checks Establish a universal background check system for all persons purchasing a firearm from any seller High risk individuals Expand the set of conditions that disqualify an individual from legally purchasing a firearm Mental health Focus federal restrictions on gun purchases by persons with serious mental illness on the dangerousness of the individual Trafficking and dealer licensing Appoint a permanent director to ATF and provide the agency with the authority to develop a range of sanctions for gun dealers who violate gun sales or other laws Personalized guns Provide financial incentives to states to mandate childproof or personalized guns Assault weapons and high capacity

magazines Ban the future sale of assault weapons and the future sale and possession of large capacity ammunition magazines
Research funds Provide adequate federal funds to the Centers for Disease Control and Prevention National Institutes of Health and National Institute of Justice for research into the causes and solutions of gun violence The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans including gun owners for stronger gun policies Preventing Violence Against Women and Children Institute of Medicine, Board on Global Health, Forum on Global Violence Prevention, 2011-10-12 Violence against women and children is a serious public health concern with costs at multiple levels of society Although violence is a threat to everyone women and children are particularly susceptible to victimization because they often have fewer rights or lack appropriate means of protection In some societies certain types of violence are deemed socially or legally acceptable thereby contributing further to the risk to women and children In the past decade research has documented the growing magnitude of such violence but gaps in the data still remain Victims of violence of any type fear stigmatization or societal condemnation and thus often hesitate to report crimes The issue is compounded by the fact that for women and children the perpetrators are often people they know and because some countries lack laws or regulations protecting victims Some of the data that have been collected suggest that rates of violence against women range from 15 to 71 percent in some countries and that rates of violence against children top 80 percent These data demonstrate that violence poses a high burden on global health and that violence against women and children is common and universal Preventing Violence Against Women and Children focuses on these elements of the cycle as they relate to interrupting this transmission of violence Intervention strategies include preventing violence before it starts as well as preventing recurrence preventing adverse effects such as trauma or the consequences of trauma and preventing the spread of violence to the next generation or social level Successful strategies consider the context of the violence such as family school community national or regional settings in order to determine the best programs **Eliminating Serious Injury and Death from Road Transport** Ian Ronald

Johnston, Carlyn Muir, Eric William Howard, 2013-12-11 Listen Ian Johnston busts the bad behavior myth Should we really accept road trauma as collateral damage from daily road use Eliminating Serious Injury and Death from Road Transport A Crisis of Complacency explores why societies and their elected leaders view traffic safety as a relatively minor problem It examines the changes in the culture of road use that need to occur if this public health problem is to be effectively resolved Examines why road use culture is ego centric what's in it for me and why this blocks progress Explores current traffic safety measurement methods and demonstrates how they have underpinned our flawed approach Discusses the controversial issue of speed and speeding and shows how a new approach to speed management will be fundamental to transformational change Details a simple account of the concept of a Safe System as now promoted by the WHO and the OECD while exploring the failure to get beyond the principles to extensive implementation The book dispels the myths that currently drive societies

misguided view of traffic safety the bad behavior myth and the official myth that everything that can be done is being done and how these myths limit progress in reducing death and serious injury It presents current scientific knowledge and draws parallels with other areas of public safety and health The book draws on examples from the media and from public policy debates to paint a clear picture of a flawed public policy approach It presents a model for a preventive medicine approach to traffic safety policy to get beyond an ego centric culture to a communal safety culture
