compete and even outperform its competitors with world class products However the European dustry is now faced with growing competition and growth from new emerging low cost countries and needs to re define its competitive advantage to remain at the forefront of the sector Automotive growth is driven by two factors new m kets and new technologies Global competition is increasing with technology and product differentiation becoming the most important sales factors but with c tinued cost pressure Within the market the winners will be more profitable and the losers will disappear The Automotive Industry makes a significant contribution to the socio economic fabric of the European Union Manufacturing output represents 700 billion and research and development spending 24 billion European automotive suppliers number 5000 member companies and represent 5 million employees and generate 500 billion in revenues These are significant figures that generate wealth and high value employment within the EU European firms must consistently improve their competitive position to ensure that the industry does not migrate to growing new markets
