Tropic Of Chaos Climate Change And The New Geography Of Violence:

Tropic of Chaos Christian Parenti, 2011-06-28 An investigative journalist visits the economically and politically battered post colonial nations around the earth s mid latitudes and reveals how extreme weather in the era of climate change is breeding banditry humanitarian crises and state failure *Global Capitalism and the Crisis of Humanity* William I.

Robinson, 2014-07-28 This exciting new study provides an original and provocative expos of the crisis of global capitalism in its multiple dimensions economic political social ecological military and cultural Building on his earlier works on globalization William I Robinson discusses the nature of the new global capitalism the rise of a globalized production and financial system a transnational capitalist class and a transnational state and warns of the rise of a global police state to contain the explosive contradictions of a global capitalist system that is crisis ridden and out of control Robinson concludes with an exploration of how diverse social and political forces are responding to the crisis and alternative scenarios for the future

Ramblin' Bob Dayton Lummis, 2012-05 The stage and film actor Peter Holden Parkhurst has called Dayton Lummis a cosmic town crier Indeed that he is and more This latest volume Ramblin Bob will reveal that Read it The California social critic Tom Englezos said of Lummis s previous collection of acerbic thoughts and often politically incorrect observations I thoroughly and absolutely enjoyed NOTES I was informed and often outraged Great stuff Damn I hope you have more coming A lot more Ramblin Bob is more And still more **The SAGE Encyclopedia of War: Social Science Perspectives** Paul

C. McIlhenny, 2015-09-18 The Great Recession like most economic depressions has compelled many to reconsider not only the consequences but also the very nature of contemporary global capitalism Sadly very little critical reflection on the fundamental nature of the world s hegemonic economic system has come from its most devout disciples evangelicals Throughout the pages of the Old and New Testament God reprimands those driven by a love for gain By way of the cultural mandate God has given humanity the responsibility to care not only for their fellow human beings but also for the earth itself True and undefiled religion includes taking care of those forgotten marginalized and made invisible by all consuming and all

mighty capital As such those who accumulate wealth by destroying creation dishonor their Creator Has the Christian community gone far enough in meeting the needs of the poor in seeking the end of poverty or in curbing the rapacious appetites of the greedy few in order to preserve that which is good true and beautiful within God s creation Render Unto God calls Christians to reconsider their ideological commitment to unrestrained capitalism to rethink not only the profit motive an essential element of capitalism if not its central telos the meaning of private property and the dominion of the global power elite but also to understand how market fundamentalism fractures families creates systems of inequality and destroys the environment Have we forgotten our commitment to God neighbor and creation Have we forgotten our primary purpose the reason for our existence namely to glorify God and enjoy him forever

Conflict Analysis Matthew Bernard Levinger,2013 Conflict Analysis Understanding Causes Unlocking Solutions is a guide for practitioners seeking to prevent deadly conflict or mitigate political instability This handbook integrates theory and practice and emphasizes the importance of analyzing the causes of peace as well as the causes of conflict It stresses that conflict analysis is a social as well as an intellectual process helping practitioners translate analysis into effective action

Anthropocene or Capitalocene? Jason W. Moore, 2016-06-01

The Earth has reached a tipping point Runaway climate change the sixth great extinction of planetary life the acidification of the oceans all point toward an era of unprecedented turbulence in humanity's relationship within the web of life But just what is that relationship and how do we make sense of this extraordinary transition Anthropocene or Capitalocene offers answers to these questions from a dynamic group of leading critical scholars They challenge the theory and history offered by the most significant environmental concept of our times the Anthropocene But are we living in the Anthropocene literally the Age of Man Is a different response more compelling and better suited to the strange and often terrifying times in which we live The contributors to this book diagnose the problems of Anthropocene thinking and propose an alternative the global crises of the twenty first century are rooted in the Capitalocene the Age of Capital Anthropocene or Capitalocene offers a series of provocative essays on nature and power humanity and capitalism Including both well established voices and younger scholars the book challenges the conventional practice of dividing historical change and contemporary reality into Nature and Society demonstrating the possibilities offered by a more nuanced and connective view of human environment making joined at every step with and within the biosphere In distinct registers the authors frame their discussions within a politics of hope that signal the possibilities for transcending capitalism broadly understood as a world ecology that joins nature capital and power as a historically evolving whole Contributors include Jason W Moore Eileen Crist Donna J Haraway Justin McBrien Elmar Altvater Daniel Hartley and Christian Parenti

Crime, Violence, and Global Warming John P. Crank, Linda S. Jacoby, 2015 *Crime Violence and Global Warming* introduces the many connections between climate change and criminal activity Conflict over natural resources can escalate to state and non state actors resulting in wars asymmetrical warfare and terrorism Crank and Jacoby apply criminological theory to each aspect of this complicated web helping readers to evaluate conflicting claims about global warming and to analyze evidence of the current and potential impact of climate change on conflict and crime Beginning with an overview of the science of global warming the authors move on to the links between climate change scarce resources and crime Their approach takes in the full scope of causes and consequences

present and future in the United States and throughout the world The book concludes by looking ahead at the problem of forecasting future security implications if global warming continues or accelerates This fresh approach to the criminology of climate change challenges readers to examine all sides of this controversial question and to formulate their own analysis of our planet s future Crime, Violence, and Global Warming John Crank,Linda Jacoby,2015-05-20 Crime Violence and Global Warming introduces the many connections between climate change and criminal activity Conflict over natural resources can escalate to state and non state actors resulting in wars asymmetrical warfare and terrorism Crank and Jacoby apply criminological theory to each aspect of this complicated web helping readers to evaluate conflicting claims about global warming and to analyze evidence of the current and potential impact of climate change on conflict and crime Beginning with an overview of the science of global warming the authors move on to the links between climate change scarce resources and crime Their approach takes in the full scope of causes and consequences present and future in the United States and throughout the world The book concludes by looking ahead at the problem of forecasting future security implications if global warming continues or accelerates This fresh approach to the criminology of climate change challenges readers to examine all sides of this controversial question and to formulate their own analysis of our planet s future Climate Change, Human Security and Violent Conflict Springer,2012-07-28 **The Other of Climate Change** Andrew Baldwin,2022-08-31 If the predictions are correct climate change will force millions of people from their homes threatening a future of humanitarian crises political violence and strife In The Other of Climate Change Andrew Baldwin intervenes in the international political debate about climate change and human migration to tell a different story He argues that international attempts to govern those who stand to be displaced by climate change are as much or more to do with resuscitating European humanism at a moment in which geophysical phenomena like climate change and the Anthropocene threaten to extinguish the human altogether Through detailed interpretations of the figure of the climate migrant refugee Baldwin traces the contours of an emerging form of planetary racial rule racial futurism unfolding in the context of the climate change crisis He shows how racial futurism takes shape as a political response to the crisis of humanism that is said to lay at the heart of the climate change crisis Along the way he examines numerous themes that are at the forefront of contemporary thinking about climate change and politics including the political humanism sovereignty neoliberalism the international and race Ultimately the book is a plea for scholars activists and policymakers to take seriously the way race and racism are bound up with the political discourse on climate change and migration and to ask what this means for the wider political debate about climate change and the future **Climate Change, Human Security and Violent Conflict** Jürgen Scheffran,Michael Brzoska,Hans Günter Brauch,Peter Michael Link,Janpeter Schilling,2016-08-23 Severe droughts damaging floods and mass migration Climate change is becoming a focal point for security and conflict research and a challenge for the world s governance structures But how severe are the security risks and conflict potentials of climate change Could global warming

trigger a sequence of events leading to economic decline social unrest and political instability What are the causal relationships between resource scarcity and violent conflict This book brings together international experts to explore these questions using in depth case studies from around the world Furthermore the authors discuss strategies institutions and cooperative approaches to stabilize the climate society interaction **Climate Wars** Harald Welzer,2015-02-12 Struggles over drinking water new outbreaks of mass violence ethnic cleansing civil wars in the earth s poorest countries endless flows of refugees these are the new conflicts and forces shaping the world of the 21st century They no longer hinge on ideological rivalries between great powers but rather on issues of class religion and resources The genocides of the last century have taught us how quickly social problems can spill over into radical and deadly solutions Rich countries are already developing strategies to garner resources and keep climate refugees at bay In this major book Harald Welzer shows how climate change and violence go hand in hand Climate change has far reaching consequences for the living conditions of peoples around the world inhabitable spaces shrink scarce resources become scarcer injustices grow deeper not only between North and South but also between generations storing up material for new social tensions and giving rise to violent conflicts civil wars and massive refugee flows Climate change poses major new challenges in terms of security responsibility and justice but as Welzer makes disturbingly clear very little is being done to confront them The paperback edition includes a new Preface that brings the book up to date and addresses the most recent developments and trends A Climate of Conflict Dan Smith,2007

With Speed and Violence Fred Pearce,2007 As Pearce began work on this book normally cautious scientists beat a path to his door to tell him about their fears and their latest findings Now he presents this up to date and readable book about the growing evidence for global warming and the large climatic effects it may unleash *The Heat and the Fury* Peter Schwartzstein,2024-09-26 A landmark work on perhaps the essential question of our time David Wallace Wells author of *The Uninhabitable Earth* In this ground breaking book environmental journalist Peter Schwartzstein takes the reader on the first on the ground exploration of climate change s contribution to global conflict From the ravaged villages of Iraq where ISIS has used drought as a recruiting tool and weapon of terror to the pirate ridden waters of Bangladesh and drawing on more than a decade of reporting from dozens of countries Schwartzstein writes about the unexpected ways in which climate change is feeding global unrest and conflict Through the stories of the soldiers farmers spies and others affected around the world he makes sense of a form of conflict that remains poorly understood even as it devastates the lives of so many millions of people While researching this book Schwartzstein was chased by kidnappers detained by police and told in no uncertain terms that he was no longer welcome in certain countries Yet as he recounts these personal brushes with violence are simply a hint of the conflict simmering in our warming world As Schwartzstein s unparalleled reporting shows there s nothing inevitable about climate violence In fact as he sets out the same stresses that are pitching people against one another can even help bring them back together Rethinking Climate Change, Conflict and Security Jan Selby,Clemens

Hoffmann,2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of Geopolitics

Unstable Ground Alex Alvarez,2017-07-25 Unstable Ground looks at the human impact of climate change and its potential to provoke some of the most troubling crimes against humanity ethnic conflict war and genocide Alex Alvarez provides an essential overview of what science has shown to be true about climate change and examines how our warming world will challenge and stress societies and heighten the risk of mass violence Drawing on a number of recent and historic examples including Darfur Syria and the current migration crisis this book illustrates the thorny intersections of climate change and violence The author doesn t claim causation but makes a compelling case that changing environmental circumstances can be a critical factor in facilitating violent conflict As research suggests climate change will continue and accelerate understanding how it might contribute to violence is essential in understanding how to prevent it □□□□□□ □□□□ 2014,
