Whats Faster Automatic Or Manual:

Handbook of Stemmatology Philipp Roelli, 2020-09-07 Stemmatology studies aspects of textual criticism that use genealogical methods to analyse a set of copies of a text whose autograph has been lost This handbook is the first to cover the entire field encompassing both theoretical and practical aspects of traditional as well as modern digital methods and their history As an art ars stemmatology's main goal is editing and thus presenting to the reader a historical text in the most satisfactory way As a more abstract discipline scientia it is interested in the general principles of how texts change in the process of being copied Thirty eight experts from all of the fields involved have joined forces to write this handbook whose eight chapters cover material aspects of text traditions the genesis and methods of traditional Lachmannian textual criticism and the objections raised against it as well as modern digital methods used in the field The two concluding chapters take a closer look at how this approach towards texts and textual criticism has developed in some disciplines of textual scholarship and compare methods used in other fields that deal with descent with modification The handbook thus serves as an introduction to this interdisciplinary field

Gastrointestinal Pathology Geraint T. Williams, 2012-12-06 There have been many advances in the field of gastrointestinal pathology which are of considerable clinical significance during the 13 years since the last publication of a volume of Current Topics in Pathology devoted to this subject Many have arisen from the application of new techniques of histochemistry immunocytochemistry quantitative morphometry and molecular and cell biology to gastrointestinal diseases but some notably the recognition of the association of *Campylobacter pylori* with the commonest type of chronic gastritis have been achieved using such long established routine histological procedures that one wonders how their significance had escaped recognition for so long The topics covered in this volume have been selected because they present advances of relevance to the diagnostic clinical pathologist However they represent the personal selection of the editor and are in no way exhaustive Many other examples of progress in our understanding of the pathophysiology of gastrointestinal diseases have been omitted either because of the confines of space or because they have been well reviewed recently in other publications Most of the workload of the practising gastrointestinal pathologist involves the diagnosis and assessment either of inflammation or of neoplasia in the alimentary tract and this is reflected in the topics presented in this book

KATE Sarah Henley, 2025-04-27 The old world order is fading For generations monarchs held sway but now the reins of power are shifting Yet whispers of a return to tradition are growing louder and a bold plan is hatched to reclaim what was lost At the heart of this ambition are three young individuals Sergei a descendant of a fallen empire Kate with a lineage of her own and Katrine tied to their destinies in ways they are only beginning to understand Entrusted with their safety are Dominic and Christine protectors whose loyalty runs deeper than duty As these five lives intertwine bonds of friendship and affection blossom creating a complex web of connections Their path towards the future requires knowledge and skill leading them to a unique centre of learning But the journey is fraught with secrets and unexpected obstacles that will test their resilience and challenge the very foundations of their plan Betrayals will sting memories will be lost and found and alliances will be forged in unexpected places As they navigate a world on the brink of change these young people will discover hidden

Todd-Pokropek,2003-05-21 The 1999 international conference on Information Processing in Medical Imaging IPMI 99 was the sixteenth in the series of biennial meetings and followed the successful meeting in Poultney Vermont in 1997 This year for the first time the conference was held in central Europe in the historical Hungarian town of Visegrád one of the most beautiful spots not only on the Danube Bend but in all Hungary The place has many historical connections both national and international The castle was once a royal palace of King Matthias In the middle ages the Hungarian Czech and Polish kings met here Recently after the summit meeting of reestablished democracies in the area it became a symbol for the cooperation between central European countries as they approached the European Union It was thus also symbolic to bring IPMI in the year of the 30th anniversary of its foundation to this place and organize the meeting with the close cooperation of local and traditional western organizers It also provided a good opportunity to summarize briefly a history of IPMI for those who were new to the IPMI conference This year we received 82 full paper submissions from all over the world Of these 24 were accepted as oral presentations These were divided into 6 sessions In spite of our efforts it was found to be impossible to make these sessions fully balanced and homogeneous *Analysis of Productivity* United States Civil Service Commission,1973
