Transnational Capitalism And The Struggle Over European Integration:

Transnational Capitalism and the Struggle over European Integration Bastiaan van Apeldoorn, 2003-08-27 This book presents an analysis of the transnational social forces in the making of a new European socio economic order that emerged out of the European integration process during the 1980s and 1990s Arguing that the political economy of European integration must be put within the context of a changing global capitalism Van Apeldoorn examines how European change is linked to global change and how transnational actors mediate these changes

Trade Unions and European Integration Johannes Kiess, Martin Seeliger, 2019-05-23 Trade Unions and European Integration brings together pessimists and optimists on trade unionism under the contemporary pressures of European integration The Great Recession has brought new attention to structural problems of the European integration process specifically monetary integration holding the potential of disabling any trans national co ordination Other authors argue that the current crisis also poses the chance for mobilization and new impulses for European trade unionism This is discussed in the volume alongside a variety of topics including bargaining coordination co determination European governance regimes and European wide mobilization While the importance of the question of how trade unionism and wage policy can will and should develop under the conditions of European integration seems widely shared the polarization of the debate itself deserves our attention to learn about the opposing arguments and points of view and to enhance academic discussion as well as consultancy to policy makers This volume addresses this debate by bringing together the most distinguished voices and searching for common ground as well as new perspectives on European trade unionism and collective bargaining The chapters of the volume organised topically are each accompanied by a comment from a distinguished scholar highlighting the divisions of the debate With this innovative approach this book advances the dialogue between what have become openly opposed camps of optimists and pessimists on the future of European integration trade unionism and its future chances Trade Unions and European Integration will appeal to students and researchers interested in fields such as European Studies Industrial Relations Political Economics Social Movements and Sociology of Work

Globalisation and European Integration Petros Nousios, Henk Overbeek, Andreas Tsolakis, 2012-05-04 This book explores the links between European integration and globalisation and examines the potential for social transformation in the context of the global economic crisis and the resulting EU reforms Divided into three parts this book offers both empirical and theoretical analyses of social integration supranationality and global competition Drawing on Critical Political Economy research Neo Gramscian Open Marxist Regulationist and Post structuralist scholars subject a wide range of European flagship policies in matters of competition trade and security to critical scrutiny and relate them to global political economy dynamics Contributors examine the ways in which current global economic turbulence has affected the European Union its

membership and its adjacent areas and determine the potential for economic and political transformation in light of the global economic crisis and Europe's 2020 Strategy. In the emerging multi-polar world in which the EU and the US are expected to share global policymaking with new powers, this book argues for a revised conceptualisation of European integration and its relationship with globalisation. Globalisation and European Integration will be of interest to students, scholars and researchers of globalisation, political economy, international relations and European Union politics.

Select Proceedings of the European Society of International Law, Volume 4, 2012 Mariano J Aznar, Mary E Footer, 2016-01-28 This is the fourth in the Series of Select Proceedings of the European Society of International Law (ESIL) featuring the most important and interesting papers presented at the Fifth Biennial Conference on Regionalism and International Law organised by ESIL and the University of Valencia in 2012. As usual, the best papers from that conference have been re-written, edited and drawn together by the two editors to present a perspective on what is a flourishing forum for the discussion of new ideas and scholarship on international law.

A Ruined Fortress? Alan W. Cafruny, Magnus Ryner, 2003 Arguing convincingly that mainstream theory lacks the tools to adequately explain European integration, this challenging book draws upon critical political economic theory to develop a more comprehensive and consistent analysis of the processes of integration. Although not claiming that states have ceded their role as masters of the treaties, the contributors develop innovative case studies of national and transnational processes to illustrate the salience of trans-European business networks and the primacy of neoliberalism as central organizing concepts of the post-Maastricht European project.

Contradictions and Limits of Neoliberal European Governance J. Drahokoupil, L. Horn, 2008-11-27 An ambitious volume that sets out to analyse the nature, contradictions and limits of neoliberal governance in the EU. The analysis covers the changing geopolitical and geo-economic context, the Lisbon agenda and the contestation and mobilization against the European project such as manifested in the national resistance against the constitution.

Cosmopolitan Government in Europe Owen Parker, 2013-04-26 The invocation of the market has been omnipresent in media discussions of crisis Europe. On the one hand, the market is presented as that to which EU member states must collectively respond. It is the very purpose of a post-national government and that which dictates individual and collective identities. The expansion of market is that which guarantees and constitutes peace in Europe. On the other hand, the market is that which government must seek to tame. It is the servant of government and ought not be permitted to undermine collective identities and solidarities associated with the juridical imaginary of social contract and sovereign nation state. It is from this perspective the expansion of the social institutions of nation state into the post-national arena that will constitute a lasting peace in Europe. *Cosmopolitan Government in Europe* uses a Foucauldian lens to consider the ethics of the scholarly and institutional discourses associated with these apparently divergent market and legal cosmopolitan visions of Europe. It reflects on attempts to reconcile or move beyond these discourses, particularly through the invocation of more pluralist modes of governance, but claims that such moves have been largely unsuccessful in

both practice and theory It argues that the very ambiguity in the relationship between the ideal subjects that these market and legal visions promote respectively post national entrepreneur and citizen is that which permits a space for resistance and politics Thus the book argues for a pragmatic politics which is cognizant of the violent potential inherent in any cosmopolitan attempt to govern Europe while recognising the contemporary dangers associated with the dominance of a market cosmopolitan Europe This work is an important and timely intervention in contemporary debates about democratic Europe and its shortcomings and will be of great interest to scholars of international political theory European studies and international political economy
