Experienced foster carer Rosie Lewis accepts the youngster as an emergency placement knowing that her autism will represent a challenge not only for her but also for the rest of the family. But after several shocking incidents of self harming pica and threats to kill it soon becomes apparent that Phoebe's autism may be the least of her problems. *Doctored* Polly A. Magena, 2017-09-22 This is a shocking true story about a woman

surviving life long abuse eventually leading to the kidnap of her two small children by their father. They never came home. Her former partner launched a terrible campaign of revenge isolating her with no family support and a damaged reputation.

Counterpredators is a modern solution to an ancient problem. Parents face the overwhelming responsibility of training their children to navigate the threat environment and safely molding them into powerful self aware authentic adults. At the same time many parents do not themselves possess the necessary skill set and when their children sense this they begin to adopt questionable heroes and role models. In the natural world animal parents train their young by repeatedly exposing them to hazard while demonstrating efficient risk management yet our society teaches us to do the exact opposite. Shelter and protect our children from whatever might harm them. As a result many children are profoundly unprepared to deal with real threat. Since both animal and human young are equally vulnerable it is easy to spot the weak link. The unprepared human parent. To solve this problem parents need to assume a powerful new identity something unique and elemental that rivets the attention and imagination of their children. They must become counterpredators individuals who have the skill and the will to engage and overcome human threats. Counterpredators is the story of how to achieve this transition using cutting edge methodology. Survival Response Conditioning the re activation of dormant subconscious survival skills combined with high pressure.
