Travelling Concepts In The Humanities Travelling Concepts In The Humanities:

Travelling Concepts in the Humanities Mieke Bal, Sherry Marx-MacDonald, 2002-01-01 Bal's focus for this book is the idea that interdisciplinarity in the humanities necessary exciting serious must seek its heuristic and methodological basis in concepts rather than its methods Travelling concepts in the humanities Mieke Bal, 2002 **Travelling Concepts** Christian Lammert, Katja Sarkowsky, 2009-12-03 Bhikhu Parekh As creative and reflective agents human beings seek meaning in their lives and develop more or less coherent views of the world or cultures in terms of which to organize their personal and collective lives When different groups of individuals within the same society subscribe to different ways of thought they face the crucial question of how to deal with their cultural diversity and sustain a shared common life Premodern societies took a relatively relaxed view of diversity and generally opted for a looser union Modernity brought with it a very different approach to the subject This is reflected in among other things the institution of the modern state especially the liberal democracy which represents one way of constituting it Liberal democracy has exercised a decisive influence on our political and moral imagination for the past three centuries Unlike premodern societies which took the community as their starting point and defined the individual in terms of it it takes the individual as the ultimate and irreducible unit of and thus conceptually and ontologically prior to society The latter is taken to consist of individuals and refers to the totality of its members and their formal and informal relationships Individual are the sole and equal sources of moral claims and social and political institutions are judged in terms of their ability to safeguard and promote individual interests **The Travelling Concepts of Narrative** Mari Hatawara, Lars-Christer Hydén, Matti Hyvärinen, 2013-06-15 Narrative is a pioneer concept in our transdisciplinary age For decades it has been one of the most successful catchwords in literature history cultural studies philosophy and health studies While the expansion of narrative studies has led to significant advances across a number of fields the travels for the concept itself have been a somewhat more complex Has the concept of narrative passed intact from literature to sociology from structuralism to therapeutic practice or to the study of everyday storytelling In this volume philosophers psychologists literary theorists sociolinguists and sociologists use methodologically challenging test cases to scrutinize the types transformations and trajectories of the concept and theory of narrative The book powerfully argues that narrative concepts are profoundly relevant in the understanding of life experience and literary texts Nonetheless it emphasizes the vast contextual differences and contradictions in the use of the concept Travelling Concepts for the Study of Culture Birgit Neumann, Ansgar Nünning, 2012-10-01 Bringing together innovative and internationally renowned experts this volume provides concise presentations of the main concepts and cutting edge research fields in the study of culture rather than the infinite multitude of possible themes More specifically the volume outlines different models for the study of culture explores avenues for interdisciplinary exchange assesses key concepts and traces their travels across various disciplinary historical and national contexts To trace the travelling of concepts means to map both their transfer from one

discipline approach or culture of research to another and also to identify the transformations which emerge through these processes of transfer The volume serves to show that working with travelling concepts provides a unique strategy for research and research design which can open up a wide range of promising perspectives for interdisciplinary exchange It offers an exemplary overview of an interdisciplinary and international approach to the travelling concepts that organize structure and shape the study of culture In doing so the volume serves to initiate a dialogue that exceeds disciplinary and national boundaries and introduces a self reflexive dimension to the field thus affording a recognition of how deeply disciplinary premises and nation specific research traditions affect different approaches in the study of culture

Travelling Concepts, Metaphors, and Narratives Sibylle Baumbach, Beatrice Michaelis, Ansgar Nünning, 2012

Traveling Traditions Erik Redling, 2016-03-21 This study seeks to fill a major gap in the fields of Nineteenth Century American and British Studies by examining how nineteenth century intellectuals shaped and re shaped aesthetic traditions across the Atlantic Ocean Special attention is paid to a group of salient cultural concepts such as artist as hero imagination the picturesque reform simultaneity and seriality Although embedded in a particular aesthetic tradition these concepts travel from one culture to another and are transformed along their transatlantic journeys The purpose of this book is to explore the roles of these traveling concepts within the realm of transatlantic cultures and to trace their at times surprising paths within ever widening transnational intellectual networks

Art + Archive Sara Callahan, 2022-01-25 Art Archive provides an in depth analysis of the connection between art and the archive at the turn of the twenty first century The book examines how the archive emerged in art writing in the mid 1990s and how its subsequent ubiquity can be understood in light of wider social technological philosophical and art historical conditions and concerns Deftly combining writing on archives from different disciplines with artistic practices the book clarifies the function and meaning of one of the most persistent artworld buzzwords of recent years shedding light on the conceptual and historical implications of the so called archival turn in contemporary art
