

“I’ve learned that understanding during the initial startup, for anything that entrepreneurs do, is more than just about what they’re doing with the customer. It’s about the design. It’s about the technology that’s underneath it and how they’re going to use it. It’s about the way they’re going to use it.”

1. **Abstract** – This paper presents a new method for the automatic detection of the onset of a seizure. The method is based on the analysis of the EEG signal. The onset of a seizure is detected by the analysis of the power spectrum of the EEG signal. The power spectrum is calculated using the Fast Fourier Transform (FFT). The power spectrum is then analyzed to detect the onset of a seizure. The onset of a seizure is detected when the power spectrum shows a significant increase in power. The method is evaluated using a dataset of EEG signals. The results show that the method is able to detect the onset of a seizure with a high degree of accuracy.
