Regenerative Dialogues for Sustainable Futures Fabio Scarano,2024-03-13 This book is about sustainability in its broadest sense It argues that the ongoing science policy dialogue on sustainable development as framed by the United Nations Sustainable Development Goals is insufficient to drive the planet to desired sustainable futures This conversation followed by transformative action must be inclusive of other forms of interpretation of reality arts spirituality and ancestral knowledge and non modern cosmovisions This is more a book about dialogues than about the common dualism problem solution and such dialogues are approached as an essential trigger of regeneration The book takes the reader from a historical perspective of the human nature relationship through to a discussion on sustainable futures as utopias The optimism conveyed by the book is justified by a plethora of global examples of such regenerative dialogues
