Canadian Journal of Physiology and Pharmacology ,2001-07 Food Authentication Contantinos A. Georgiou,Georgios P. Danezis,2017-05-08 The determination of food authenticity is a vital component of quality control Its importance has been highlighted in recent years by high profile cases in the global supply chain such as the European horsemeat scandal and the Chinese melamine scandal which led to six fatalities and the hospitalisation of thousands of infants As well as being a safety concern authenticity is also a quality criterion for food and food ingredients Consumers and retailers demand that the products they purchase and sell are what they purport to be This book covers the most advanced techniques used for the authentication of a vast number of products around the world The reader will be informed about the latest pertinent analytical techniques Chapters focus on the novel techniques markers that have emerged in recent years An introductory section presents the concepts of food authentication while the second section examines in detail the analytical techniques for the detection of fraud relating to geographical botanical species and processing origin and production methods of food materials and ingredients Finally the third section looks at consumer attitudes towards food authenticity the application of bioinformatics to this field and the Editor s conclusions and future outlook Beyond being a reference to researchers working in food authentication it will serve as an essential source to analytical scientists interested in the field and food scientists to appreciate analytical approaches This book will be a companion to under and postgraduate students in their wander in food authentication and aims to be useful to researchers in universities and research institutions **Special Topics on**

strategy The latter areas of research are clearly central to the sustainable development approach that is currently attracting global attention Over the decades much of the literature on has focused on the biological and ecological aspects of phytoplankton found in freshwater marine and brackish water environments However these organisms are known to also inhabit various other environments More recently there has been a substantial shift toward the concept of sustainable development and the green economy with emphasis on exploiting biological systems for the benefit of mankind The significance of these plankton cannot be underestimated as they contribute approximately 40% of the oxygen in the atmosphere Therefore there is potential for exploitation of this invaluable biomass source that could lead to significant environmental and economic benefits for man Providing a comprehensive outline of the most recent developments and advances in the field of industrial applications of these plankton this book is an excellent reference resource for researchers and practitioners

Canadian Journal of Forest Research ,1999 **Anaerobic Treatment of Mine Wastewater for the Removal of Selenate and its Co-Contaminants** Lea Tan,2018-09-03 Selenium Se pollution has led to several cases of severe aquatic ecosystem deterioration due to Se poisoning caused by bioaccumulation over time However the removal of selenate SeO_4^{2-} from wastewater streams with co contaminants has been largely considered as a

black box in anaerobic biological systems using mixed consortia This research aimed at addressing the effect of wastewater characteristics i e co contaminants such as nitrate NO₃ and sulfate SO₄²⁻ heavy metals and pH on the biological reduction of SeO₄²⁻ and evaluating process integration for Se laden wastewater treatment with co contaminants This study demonstrated that the presence of co contaminants can actually be beneficial for Se removal provided that the concentrations are carefully monitored and appropriate operating conditions and process configurations are used The Se removal total Se and SeO₄²⁻ efficiency increased by 30% in the presence of NO₃ and or SO₄²⁻ compared to systems with SeO₄²⁻ alone Additionally an integrated process of an ion exchange IX column and bioreactors showed improved overall removal capacity for SO₄²⁻ and total Se The knowledge and information gained from this research can help in the advancement and application of biological processes i e predicting of reactor performance solving specific design or practical problems and implementing novel treatment techniques for Se laden mine wastewater
