Philosophy and Theory in Educational Research Amanda Fulford, Naomi Hodgson, 2016-06-10 Philosophy and Theory in Educational Research Writing in the margin explores the practices of reading and writing in educational philosophy and theory Showing that there is no right way to approach research in educational philosophy but illustrating its possibilities this text invites an engagement with philosophy as a possibility and opening possibilities for educational research Drawing on their own research and theoretical and philosophical sources the authors investigate the important issue of what it means to read and write when there is no prescribed structure Innovative in its contribution to the literature this edited volume enlightens readers in three ways The volume focuses on the practices of reading and writing that are central to research in educational philosophy suggesting that these practices constitute the research rather than simply reporting it It is not a prescriptive guide and should not be read procedurally Rather it is intended to illustrate the possibilities for this kind of research and to suggest starting points for those pursuing research projects Finally attention is given to the ways in which conducting educational philosophy can be educative in itself both to the researcher in writing it and to its audience in reading it With contributions from international scholars in the field of educational philosophy this book is a valuable guide for practitioner researchers taught postgraduate and doctoral students and early career researchers in university education departments Academic staff teaching research methods and seeking to introduce their students to philosophy as research without wishing to offer a prescriptive how to guide will also find this book of particular interest

Understanding Education and Educational Research Paul Smeyers, Richard Smith, 2014-11-10 Educational research is widely believed to be essentially empirical consisting mainly of collecting and analysing data with randomised control trials as the gold standard This book argues that good educational research is often philosophical in nature Offering a critical overview of the current state of educational research the authors argue that there are two factors in particular that distort it One is that throughout the world it is expected to serve the interests of the state in securing educational improvements as measured by standardised examination results and to demonstrate scientific credentials sufficient to guarantee absence of ideological bias and carry conviction The other is that learning to do educational research is generally seen as a matter of being trained in empirical research methods The authors demonstrate by contrast that good educational research needs the rigorous thinking characteristic of philosophy and that

philosophical treatments themselves sometimes constitute such research Isocrates James R. Muir, 2022-06-02 Isocrates is one of the most remarkable and influential figures in the history of human thought The influence of his ideas in the history of historical writing rhetoric the visual arts music religion and theology political science philosophy and above all educational philosophy and practice in Europe Australia North America North Africa and the Middle East are well established and widely known This book argues careful study of the educational philosophy of Isocrates and its legacy can contribute to an improved understanding of the historiography of educational thought his distinctive normative methodology in both political and educational philosophy and his arguments about the primary importance of the virtues of self knowledge and realistic self appraisal for educational philosophers and practitioners At a time when educational philosophy has an increasingly precarious academic existence and educationists are actively seeking new historiographical and methodological approaches to the philosophical study of education there is much to be gained by recovering and reevaluating the historiography and normative methodology of Isocrates and the role they play in educational discourse and practice today **Teachers and Philosophy** Cara E. Furman, Tomas de Rezende Rocha, 2025-02-01 Philosophers and educators come together to address contemporary issues in education Teachers and Philosophy showcases the potential of education practitioners and philosophers of education working and writing together Following Mary Louise Pratt this meeting space is referred to as a contact zone and contributors demonstrate the power and benefit of writing from this liminal space Introductory and concluding chapters provide an argument for the value of bringing together philosophers and practitioners as well as tips for facilitating these interactions Situated amid the COVID 19 pandemic the volume grapples with the challenges that practitioners face around teaching controversial topics crafting inclusive curricula indigeneity disability urban schooling nature based education rural education mental health coping with feelings of anger and more Each chapter ends with suggestions for further reading or engagement questions for reflection and discussion and an activity that a class or reading group can move through together *Philosophy and the Metaphysical Achievements of Education* Ryan McInerney, 2021-06-17 Tracing the deep connections between philosophy and education Ryan McInerney argues that we must use philosophy to reflect on the significance of educational practice to all human endeavour He uses a broad approach which takes in the relationships governing philosophy education and language to reveal education's fundamental achievements and metaphysical significance The realization of educational ideals and policies are read alongside growing skepticism regarding the theoretical and practical significance of philosophical thinking and the emphasis on resource efficiency and measurable outcomes which characterise schooling today It is from this context that McInerney defends the value inherent to the philosophy of education Drawing upon contemporary continental and analytic thinkers including Nietzsche Gadamer and Wittgenstein McInerney charts the role of education in shaping the child's metaphysical transformation through language acquisition Connecting early years and primary school education McInerney pinpoints

rationality as the crucial factor which produces critical thinking beings He presents the pursuit of philosophically minded education as a rational pursuit which enables us to philosophise and educate others in turn dispensing with the epistemological and conceptual foundationalisms of the past Philosophy East / West Oren Ergas, Sharon Todd, 2016-01-26 *Philosophy East West* showcases new scholarship in the philosophy of education and contemplative studies paying particular attention to the intersection of mindfulness evidence based science and wisdom traditions Moves beyond simplistic explanations of Eastern and Western to explore the complexity and diversity of various wisdom traditions Investigates the effect of mindfulness based curricular interventions on current educational theory and practice Uses insights from important Western philosophers including Heidegger Levinas and Foucault to situate contemplative practice within contemporary educational theory Emphasizes the importance of transcultural and intercultural approaches in the philosophy of education
