## **What Jesus Says Categorized Context:**

**Categories and Contexts** Simon Szreter, Hania Sholkamy, A. Dharmalingam, 2004-03-18 Throughout its history as a social science demography has been associated with an exclusively quantitative orientation for studying social problems As a result demographers tend to analyse population issues scientifically through sets of fixed social categories that are divorced from dynamic relationships and local contexts and processes This volume questions these fixed categories in two ways First it examines the historical and political circumstances in which such categories had their provenance and second it reassesses their uncritical applications over space and time in a diverse range of empirical case studies encouraging throughout a constructive interdisciplinary dialogue involving anthropologists demographers historians and sociologists This volume seeks to examine the political complexities that lie at the heart of population studies by focusing on category formation category use and category critique It shows that this takes the form of a dialectic between the needs for clarity of scientific and administrative analysis and the recalcitrant diversity of the social contexts and human processes that generate population change The critical reflections of each chapter are enriched by meticulous ethnographic fieldwork and historical research drawn from every continent This volume therefore exemplifies a new methodology for research in population studies one that does not simply accept and re use the established categories of population science but seeks critically and reflexively to explore test and re evaluate their meanings in diverse contexts It shows that for demography to realise its full potential it must urgently re examine and contextualize the social categories used today in population research **Duns Scotus's**

**Doctrine of Categories and Meaning** Martin Heidegger, 2024-06-06 Duns Scotus's Doctrine of Categories and Meaning is a key text for the origins of Martin Heidegger's concept of facticity Originally submitted as a postdoctoral thesis in 1915 it focuses on the 13th century philosopher theologian John Duns Scotus Heidegger first analyzes Scotus's doctrine of categories then offers a meticulous explanation of the *Grammatica Speculativa* a work of medieval grammar now known to be authored by the Modist grammarian Thomas of Erfurt Taken together these investigations represent an early foray into Heidegger's lifelong philosophical concerns the question of being in the guise of the problem of categories and the question of language in the guise of the doctrine of meaning This new and unique translation of one of Heidegger's earliest works offers an important look at his early thinking before the question of being became his central concern and will appeal to readers exploring Heidegger's philosophical development medieval philosophy phenomenological interpretations of the history of philosophy and the philosophy of language **Communicating Christ in Animistic Contexts** Gailyn Van

Rheenen, 1991-06-01 Whether in New Age mysticism occultism Haitian voodooism Chinese ancestor veneration or Japanese Shintoism animistic beliefs are widespread even today Gailyn Van Rheenen presents a rigorous biblical theological and anthropological foundation for ministering in animistic contexts *Rabbinic Categories* Jacob Neusner, 2005-09-01 A systematic study of the canonical construction of Rabbinic categories Halakhic then Aggadic followed by a comparison of the

theological category formations in Rabbinic Judaism generative vs inert primary vs subordinate The book provides a systematic and thorough account of the rules of making connections and drawing conclusions that govern in classes of documents for the Halakhah from the Mishnah through the Bavli for the Aggadah from Scripture through the Midrash compilations Genesis Rabbah Leviticus Rabbah and Pesiqta deRab Kahana for both the Mishnah and Scripture through the Bavli The book then compares and contrasts theological category formations of the Rabbinic Aggadic writings by the criteria indicated in the title generative vs inert primary vs subordinate **Formative Judaism** Jacob Neusner,2000 Examines the history philosophy and hermeneutics and law and literature of formative Judaism The Word of Life Craig R.

When it comes to sex the Bible is marred by inequality To address the consequences of that What the Bible Says About Sex asserts that modern perspectives on sexuality and gender should be separated from the more constraining historical views of traditional biblical interpretation What does the Bible say about sexuality How have traditions of biblical interpretation influenced our understanding of sex and gender What the Bible Says About Sex answers that and many other questions Not shy it analyzes why the Church claimed dominion over marriage while the female body remained a source of potential evil It wrestles with how sexuality is used not only in the past but also in the present to reinforce notions of honor and how it can be used to manipulate others Deftly it handles a discussion of semen as both profane and the seed of life It looks brazenly at the pornographic and the erotic passages of the Bible and how traditions of interpretation veiled them With the Bible frequently

invoked to support arguments in the present age over the moral limits of sexuality and gender having a greater awareness of what the Bible says about sex and how it is and has been interpreted is critical now more than ever What the Bible Says About Sex is suitable for students scholars and the general reader with an interest in sexuality and the Bible and sex and desire in both ancient and modern Christianity **Ethical Contexts and Theoretical Issues** Santiago Sia,2009-12-14 Ethics has become a particularly relevant topic for discussion and a subject for serious study It has a very long tradition of course but nowadays one hears frequently of the need because of abuses or concerns to formulate and adopt ethical codes in various areas or professions This book aims to make a philosophical contribution to the discussions and debates on the topic Compared to the traditional approach to the philosophical study of ethics however this book adopts a different strategy It shows that such ethical thinking in the concrete particulars originates in various academic and professional contexts among others But inasmuch as theoretical issues require wider and more intensive attention it argues that ethical thinking needs to be pursued further and that it can be aided by philosophical investigations In its concluding chapters the book presents an alternative foundation for ethical decision making Philosophically grounded it moves away from an individualistic ethical perspective to a relational one that has been shaped through dialogue with the various contexts in which ethical thinking arises Contextual Frames of Reference in Translation Ernst Wendland,2014-04-08 Bible translation theory and practice rightly tend to focus on the actual text of Scripture But many diverse yet interrelated contextual factors also play an important part in the implementation of a successful translation program The aim of this coursebook is to explore in varying degrees of detail a wide range of these crucial situational variables and potential influences using a multidisciplinary approach to the task Thus in order to expand and enrich the field of vision a progressive study of this complex process of intercultural interlinguistic communication is carried out according to a set of overlapping sociocultural organizational and situational cognitive orientations These contextual factors provide a broader frame of reference for analyzing interpreting and communicating the original Scriptures in a completely new contemporary setting of transmission and reception The three dimensions are then applied in a practical way to explore the dramatic throne room vision of the Apostle John Revelation 4 5 with reference to both the original Greek text and also a modern dynamic translation in Chewa a southeastern Bantu language of Africa A variety of exercises and assignments to stimulate critical and creative reflection as well as to illustrate the theoretical development of Contextual Frames of Reference is provided every step of the way Not only is translation per se discussed but the teaching and evaluation of translated texts and versions are also considered from several points of view in the final three chapters An Appendix offers a foundational essay by Professor Lourens de Vries on the subject of primary orality and the influence of this vital factor in the crosscultural communication of the Bible
