Transcendence R. U. Sirius, Jay Cornell, 2015 Transhumanism is an international movement that advocates the use of science and technology to overcome the natural limitations experienced by humanity through such developments as the Singularity the creation of machine intelligences that exceed the capacities of our biological brains the ability to replicate individual minds and put them into solidstate bodies or virtual environments individual control over mental and emotional states for enhancing functionalities and or ecstasies Some of this is happening now Some of it is still in the minds of dreamers In nearly ninety AZ entries Transcendence provides a multilayered look at the accelerating advances in artificial intelligence cognitive science genomics information technology nanotechnology neuroscience space exploration synthetic biology robotics and virtual worlds that are making transhumanism a reality Entries range from Cloning and Cyborg Feminism to Designer Babies and MemoryEditing Drugs In addition the book notes historical predecessors and personalities both in mythology and history ranging from Timothy Leary to Michael Jackson to Ray Kurzweil It also introduces the culture around Transhumanism covering all the geeky obsessions of the Transhumanist movement **Virtual Immortality - God, Evolution, and the Singularity in Post- and Transhumanism** Oliver Krüger, 2021-10-01 In recent years ideas of post and transhumanism have been popularized by novels TV series and Hollywood movies According to this radical perspective humankind and all biological life have become obsolete Traditional forms of life are inefficient at processing information and inept at crossing the high frontier outer space While humankind can expect to be replaced by their own artificial progeny posthumanists assume that they will become an immortal part of a transcendent superintelligence Krüger's award winning study examines the historical and philosophical context of these futuristic promises by Ray Kurzweil Nick Bostrom Frank Tipler and other posthumanist thinkers **Tales of the Turing Church: Hacking religion, enlightening science, awakening technology** Giulio Prisco, 2020-02-07 This book explores intersections of science and religion spirituality and technology engineering and science fiction mind and matter and outlines a new cosmic transhumanist religion Hacking religion enlightening science awakening technology **The Ethics of Superintelligent Design** Paul Golata, 2018-03-07 Artificial intelligence AI permeates Google searches the personal assistants in our smartphones and is all over our newsfeeds Watson's machine learning has already started to revolutionize many important industries including oncology law finance and entertainment The idea that man is about to increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence ASI It is within this context that there is a prevailing need for a discussion of its ethical implications As a Christian ethicist Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative ASI is a move toward the proper handling of information However how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses This important ethical conversation is being led by

humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the wetware of human brains The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible the supernatural creation account a realistic view of the state of humanity and biblical ethics Religion and Human Enhancement Tracy J. Trothen, Calvin Mercer, 2017-09-17 This collection vigorously addresses the religious implications of extreme human enhancement technology Topics covered include cutting edge themes such as moral enhancement common ground to both transhumanism and religion the meaning of death desire and transcendence and virtue ethics Radical enhancement programs advocated by transhumanists could arguably have a more profound impact than any other development in human history Reflecting a range of opinion about the desirability of extreme enhancement leading scholars in the field join with emerging scholars to foster enhanced conversation on these topics Black Transhuman Liberation Theology Philip Butler, 2019-12-12 Mediating Black religious studies spirituality studies and liberation theology Philip Butler explores what might happen if Black people in the United States merged technology and spirituality in their fight towards materializing liberating realities The discussions shaping what it means for humans to exist with technology and as part of technology are already underway transhumanism suggests that any use of technology to augment intellectual psychological or physical capability makes one transhuman In an attempt to encourage Black people in the United States to become technological progenitors as a spiritual act Butler asks whether anyone has ever been just human Butler then explores the implications of this question and its link to viewing the body as technology Re imagining incarnation as a relationship between vitality biochemistry and genetics the book also takes a critical scientific approach to understanding the biological embodiment of Black spiritual practices It shows how current and emerging technologies might align with the generative biological states of Black spiritualities in order to concretely disrupt and dismantle oppressive societal structures

Theologically Engaged Anthropology J. Derrick Lemons, 2018-08-16 After years of discussion within the field of anthropology concerning how to properly engage with theology a growing number of anthropologists now want to engage with theology as a counterpart in ethnographic dialogue Theologically Engaged Anthropology focuses on the theological history of anthropology illuminating deeply held theological assumptions that humans make about the nature of reality and illustrating how these theological assumptions manifest themselves in society This volume brings together leading anthropologists and theologians to consider what theology can contribute to cultural anthropology and ethnography It provides anthropologists and theologians with a rationale and framework for using theology in anthropological research
