Work Sciences in Sustainable Agriculture V Nielsen, 1999-06-24 This publication contains papers presented at the XXVIII CIOSTA CIGR V International Congress on 14-17 June 1999 in Horsens Denmark. It presents the latest scientific results, ideas and possibilities within work science in order to stimulate the development of agriculture towards an improved level of sustainability. The following topics are dealt with: Systems Engineering, Development and Use of Computer Application, Working Environment and Integrated Farming. Systems Engineering and Integrated Farming are new concepts which have been generated in consequence of the current debate on sustainable farming. These concepts especially show consideration for the entirety of the individual farms. The use of computer programs as a tool for the daily management is in rapid progress within agriculture. Working Environment within agriculture is a frequently neglected subject which needs to be improved. All the above mentioned topics are dealt with from different points of view on the basis of different interpretations and characterised by the scientific topics that are relevant in the individual countries. In general, the presented papers, posters, videos and PC programs show great variations in how the labour research into sustainable farming is interpreted and carried out. But the general impression is that labour research related to future farming is an essential topic. **Popular Mechanics** ,1944-12 Popular Mechanics inspires, instructs and influences readers to help them master the modern world.
