

Difference Between GST and VAT

GST, or Goods and Services Tax, has cast a shadow over India's indirect taxation system, which includes VAT, excise duty, and service tax. The fundamental reason for this is because taxes no longer have a cascading effect on the economy. VAT (Value Added Tax) is a state-level tax levied on the sale of goods either immediately after the sale invoice is prepared or when the products are moved for sale. There is a substantial amount of difference between GST and VAT.

What is GST and How Does It Work?

The Goods and Service Tax (GST) embodies the distinctive idea of 'one nation, one tax' and is a new and much-advanced manner of taxing. This taxing method was created to address fundamental difficulties discovered under the VAT regime, such as the cascading effect tax on tax placed on a product at each phase of the transaction. The final customer, in turn, had to pay a tax on a tax that had already been paid. Although GST has replaced a number of traditional state-level taxes, VAT, or value-added tax, remains in effect for some major items and services.

The advantages of implementing GST

- Tax cascades are no longer a hindrance to the economy.
- Easy to use online procedure
- Lower compliance rates
- Different treatment for e-commerce businesses

Why is VAT being merged into GST?

The Value Added Tax (VAT) was implemented in 2005 to replace the previous "Sales Tax" system. It is an indirect tax that is levied at every stage of the supply chain and is applicable to some major products that are not taxable under the GST Act, such as gasoline, diesel, and alcohol for human consumption.

VAT was adopted to help India become a more integrated economy with a single tax rate for goods and services. However, because many indirect taxes, such as VAT, were repealed and merged with GST, the taxation structure had several flaws.

VAT's disadvantages

- Input Tax Credit (ITC) cannot be claimed for services under VAT because of the taxation system's cascading effect
- In different states, different VAT rates apply.
- Also, different states have varied VAT legislation.

Handbook on Central Sales Tax Madhukar N Hiregange, Central Sales Tax CST is levied on the interstate sale of goods CST is one of the oldest tax levies and has been around since 1957 This law is by the Central Government but the administration is by the States CST levy is set at local rates The revenue neutral rates which apply to most commodities in States goes up to 15% The lower rate of 2% is available against Form C which can be issued by specified persons resellers manufacturers processors etc and cannot be issued by consumers The State VAT laws have been in place since 2003 The payment of tax filing of returns assessment reassessment etc under CST are all as per the local VAT laws which are ever changing and quite draconian The quality of the administrators in general also leaves a lot to be desired There are many disputes and demands for differential taxes from VAT departments in most states for wrong issuance of C Form in situations

where goods were not permitted to be procured against Form C GST would be in place by April 2017 if all goes well However CST law is expected to continue as a parallel levy at 1% after 1st April 2017 for a couple of years This could lead to CST continuing to be non vatable even under GST regime and an add on to costs incurred by the dealers In this book we have covered important concepts case laws and possible dispute areas along with resolution The movement of goods on stock transfer basis subsequent sale in course of import and export are a few of the important areas where tax planning and savings are possible The student who wishes to understand sales tax law could use this as a ready reference This book contains practical tips for common issues faced by practitioners in this area as well The probable impact of GST laws on concepts discussed is touched on in most chapters
