The Great Typo Hunt Jeff Deck,Benjamin D. Herson,2011-10-04 The signs of the times are missing apostrophes The world needed a hero but how would an editor with no off switch answer the call For Jeff Deck the writing was literally on the wall NO TRESSPASSING In that moment his greater purpose became clear Dark hordes of typos had descended upon civilization and only he could

wield the marker to defeat them Recruiting his friend Benjamin and other valiant companions he created the Typo Eradication Advancement League TEAL Armed with markers chalk and correction fluid they circumnavigated America righting the glaring errors displayed in grocery stores museums malls restaurants mini golf courses beaches and even a national park Jeff and Benjamin championed the cause of clear communication blogging about their adventures transforming horror into humor it's into its and coconunut into coconut But at the Grand Canyon they took one correction too far fixing the bad grammar in a fake Native American watchtower The government charged them with defacing federal property and summoned them to court with a typo ridden complaint that claimed that they had violated criminal statues Now the press turned these paragons of punctuation into grammar vigilantes airing errors about their errant errand The radiant dream of TEAL would not fade though Beneath all those misspelled words and mislaid apostrophes Jeff and Benjamin unearthed deeper dilemmas about education race history and how we communicate Ultimately their typo hunting journey tells a larger story not just of proper punctuation but of the power of language and literacy and the importance of always taking a second look

The Politics of Usability Lesley Trenner, Joanna Bawa, 2012-12-06 Why This Book Why Now It is now widely recognized that in the development of IT systems the technology driven focus of the past has been eclipsed by a concern for user satisfaction and user productivity It is well known that usability engineering helps make systems easier to use and more relevant to business needs The benefits of producing usable computer systems have been proven in careful dollar or pound calculations and any computer user who has interacted with a system designed for usability will enthuse about the benefits and refuse to go back to the bad old days More and more organizations are starting to take usability seriously Along with Microsoft and Apple and other IT organizations we now find banks insurance companies multinational pharmaceuticals and many other non IT corporations starting to do something about usability It seems as if there is plenty of material explaining how to do it HCI Human Computer Interaction or CHI Computer Human Interaction in the USA has been studied in academia for several years and there are a range of books on usability engineering for practitioners from

systems engineering and user interface design to usability evaluation. However, as many practitioners have found, although you do need to understand the theories and be familiar with the techniques, applying them in a commercial context is not a straightforward matter.
