Crain, 1985 **Theories of**

Development William Crain, 2024-04-25 Theories of Development introduces students to the most influential theorists who have contributed to our understanding of how we develop as individuals The book focuses on the theorists who have built upon the developmental tradition established by Rousseau along with other theorists including ethologists and psychoanalysts who share a developmental outlook It also considers theorists in the environmental learning theory tradition and discusses the practical implications of all theorists work This edition has been thoroughly updated throughout and now includes A new chapter comparing treatment approaches to autism Greater attention to Erikson s theory of identity formation and how it pertains to gender issues New thoughts on cultural factors in Piaget s theory Biographical material on Jane Goodall Howard Thurman and Albert Einstein that illustrate developmental processes Demonstrating how we might view the world differently at various stages of life Theories of Development is a must read for all students of psychology and education **Theories of Development ...**, 1997 **Concepts and Theories of Human Development** Richard M.

Lerner, 2013-05-13 A classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives Since the publication of the second edition developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis As a consequence a developmental systems orientation frames the presentation in this edition This new edition has been expanded substantially in comparison to the second edition Special features include A separate chapter focuses on the historical roots of concepts and theories of human development on philosophical models of development and on developmental contextualism Two new chapters surrounding the discussion of developmental contextualism one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories life span life course bioecological and action theoretical ones are presented A new chapter on cognition and development is included contrasting systems approaches to cognitive development with neo nativist perspectives A more differentiated treatment of nature oriented theories of development is provided There are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of Konrad Lorenz and a new chapter on sociobiology A new chapter concentrates

on applied developmental science *Theories of Human Development* Barbara M. Newman, Philip R. Newman, 2015-06-26

Key human development theories that continue to guide research and practice are examined in this engaging text. Ten key theories are grouped into three families: those that emphasize biological systems, environmental factors, and those that reflect an interaction between the two. This organization enhances students' ability to evaluate, compare, and contrast theories both within and across families. Each family is introduced with an overview of their unique perspectives and the rationale for grouping them together. Discussion of each theory includes the cultural/historical context during the theory's development, its key concepts and ideas, extensions of the theory in contemporary work, an example showing a modification of the theory, an application of how the theory is used to inform practice, and an analysis of how the theory answers 6 basic questions that a human development theory should address. Each chapter includes an overview of the strengths and weaknesses of the theories to facilitate comparisons. Theories that have a clear lifespan focus, along with cases and examples that address issues across the lifespan, are included. The second edition features a new chapter on bioecological theory that highlights the increased use of this theory in the development of family, school, and community intervention programs. A new epilogue that examines the same case via each of the ten theories, illustrating their similarities and differences and how these ideas cast a unique light on a common situation. New opening cases that bring theory to life, along with narrative that links the case to the chapter's concepts, guiding questions that help students compare theoretical perspectives, critical thinking questions that focus on using the theory to interpret the case and personal life experiences, and recommended resources that extend students' understanding. More examples from various disciplines that address topics students are likely to encounter as professionals. A new glossary that defines the boldfaced key terms. Enhanced website at www.psyppress.com 9781848726673 that provides instructors with a test bank, PowerPoints, discussion questions, and activities; additional cases with questions; teaching notes for using the book with various types of majors; and a conversion guide outlining changes to the new edition and students with key terms with hot links to their definitions, chapter summaries, and outlines, and additional resources for further study. Updated research and applications highlight the latest scientific developments. Ideal for advanced undergraduate or beginning graduate courses in theories of development, lifespan, or child development, taught in psychology, human development, family studies, education, and social work.

Developmental Theories Through the Life Cycle Sonia G. Austrian, 2008. In this bestselling textbook, contributors describe theories of normal human development advanced by such pioneers as Sigmund Freud, Anna Freud, Jean Piaget, Nancy Chodorow, Daniel Levinson, Erik Erikson, and Margaret Mahler. Beginning with infancy, toddlerhood, and preschool, each chapter examines corresponding ideologies concerning maturation and development in middle childhood, adolescence, adulthood, and old age, while acknowledging that no one theory can encompass all aspects of human development. In-depth analyses of the psychology and sociology of development provide educators and practitioners with insights into the specific social contexts of human behavior and help identify variables and

deviations This second edition features up to date empirical information including additional studies on diverse populations and a new chapter on attachment theory a growing area of interest for today s clinicians
