Skills for Using Theory in Social Work

James A. Forte, 2014-02-05 Using theory research evidence and experiential knowledge is a critical component of good social work. This unique text is designed to help social work students and practitioners to integrate theorizing into practice demonstrating how to search for select and translate academic knowledge for practical use in helping people improve their lives and environments. Presenting 32 core skills, *Skills for Using Theory in Social Work* provides a conceptual foundation, a vocabulary and a set of skills to aid competent social work theorizing. Each chapter outlines the knowledge and action components of the skill and its relationship to core practice behaviours along with learning and reflection activities. The lessons are divided into four parts. Section one discusses foundational material including self identification as a theorist/practitioner, the deliberate use of the term theory and a social work approach to the selection of knowledge. Section two focuses on the adept use of theorizing skills. It covers identifying assumptions, using concepts, formulating propositions, organizing theory elements inductively or deductively, summarizing and displaying the elements of a theory, gathering and organizing assessment information and communicating with clients and colleagues about tentative theories. Section three includes lessons preparing social workers for the construction of useful middle range theories including causal theories and interpretive theories and for testing and sharing these practical theories. Section four presents skills to develop critical thinking about theoretical knowledge. These include avoiding the misuse of theory, judging a theory using scientific standards, judging a theory by professional standards, critiquing theory in its cultural and historical context and making judgments about the likely long term impact of a theory. This key text will help readers to demonstrate their expertise in reflective, competent and theory informed practice. It is suitable for all social work students and practitioners, particularly those taking practice theory and human behaviour in the social environment courses.

Unsettling Beliefs Josh Diem, Robert J.

Helfenbein, 2008-03-01 This volume explores issues involved with teaching social theory to preservice teachers pursuing degrees through teacher education programs and experienced teachers and administrators pursuing graduate degrees. The contributors detail their experiences teaching theoretical perspectives regarding race, gender, ethnicity, sexuality, power and the construction of schools as an institution of the state. The editors and contributors hope to offer the beginning of a collegial dialogue within the field of education, both inside and outside the academy, about the relevance and pedagogical issues associated with such material. Additionally, the contributors offer advice on missteps to avoid and provide success stories that give hope to those who also wish to engage in the practice of teaching theory to teachers.

Rethinking Online Education Bessie Mitsikopoulou, 2015-11-17 *Rethinking Online Education* analyzes online educational materials on the recent Iraq war aimed to be used by U.S. educators in elementary and secondary schools. It is suggested that far from being ideologically neutral, these educational materials weave together resources which provide a coherent view of the Iraq war.

theme and can thus be seen as constituting a kind of an informal curriculum Mitsikopoulou argues that the teacher resources adhere to different pedagogical discourses and constitute materializations of two broad approaches to education A number of pedagogical issues are also raised in the discussion What is the difference between critical thinking and critical pedagogy How is the genre of lesson plan realized in different teaching philosophies and how do curricular texts change when they are delivered online This important book highlights the need to explore the new forms of textuality which emerge from online curricular materials and to develop an understanding of the processes of text composition distribution and consumption

Occupying Subjectivity Chris Rosedale, 2017-10-02 This book explores a variety of forms of radical political subjectivity It takes its cue from the 2011 uprisings in the Middle East and North Africa the Occupy Movement and the European Anti Austerity Movement alongside the wider opposition to authoritarian and neoliberal forms of governance from which they sprang in order to ask an urgent series of questions about the subject of radical politics Who or what is it that engages in resistance Who or what should they be And how are we to negotiate the many complexities of that second question The contributions drawing on a wide range of theoretical traditions offer a rich series of provocations towards new ways of conceptualising evaluating and imagining radical political praxis They engage different kinds of subjects including protestors dancers self burners academics settlers and humans in order to think through the ways in which contemporary subjects are constituted within and work to unsettle dominant relations of power Together the chapters open up spaces to think about how political and intellectual commitment to social change can be enlivened through attention to the subject of radical politics This book was published as a special issue of *Globalizations* **Blurred Boundaries** Klaus H.
