Peter Neary, 1993 This book presents a representative collection of papers on international trade one of the most dynamic sub fields in economics The contributions range over all the major areas of research including articles on the geographical aspects of international trade by Paul Krugman and Alan Deardorff on dynamic stochastic economies by Avinash Dixit and on endogenous growth by Gene Grossman and Elhanan Helpman In addition to the theoretical contributions the book also contains work on important policy issues such as auction quotas discussed by Kala Krishna and the role of government in economic development by Anne Krueger Also included is an assessment by Bill Ethier of the theoretical achievements of a leading authority in international trade theory Ronald Jones in whose honour the essays were written Theory, Policy and Dynamics in International Trade W.
