Navigating Through Changing Times Anne Eskola,2017-10-04 Complexity theory including the concepts of chaos and emergence has been considered one of the most revolutionary products of the 20th century having influence on science technology and economics among others Any complex systems such as organisms societies stock market or the Internet have emergent properties that cannot be reduced to the mere properties of their parts The theory has been used in organizational studies and strategic management where it offers an alternative way to look at organizations The theory rejects the idea of organizations seen as machines and a planned approach to organizational change Instead the theory underlines understanding on how organizations adapt to their environments Complexity theory suggests that organizations tend to self organize themselves to a state where they regulate themselves Complexity theory would advocate for approaches that focus on flatter more flexible organizations It shifts focus from management control to self organization and individual interrelations between different people The aim of *Navigating through Changing Times* Knowledge Work in

Complex Environment is to give insights on how complexity has changed the environment of many business organizations. Are you impressed? Sune Bjørn Larsen, 2021-03-29 *Are you impressed?* is a doctoral thesis that explores processes of organisational development and the pressure to perform and impress. Being caught up in trying to impress clients and avoid disappointment might have negative implications. Consultants might be reluctant to contest and challenge customers in honest ways because consultants are dependent on clients to hire them. However, clients are also dependent on consultants. Consultants and clients are interdependent and they are all involved in impressing each other. This stands in stark contrast to thinking of consultants as neutral facilitators, a view that dominates the descriptions of consultancy within organisational development. It is argued that impressing others in ethical ways requires self awareness and taking a position which means to enter the fluctuating paradox of constancy and change which can be very disturbing both for consultants and for the client. The alternative to reverberating to this paradox is to get lost in the other and therefore to lose oneself at the same time.
