Wonder and Education Anders Schinkel,2020-11-12 Many people whether educators or not will agree that an education that does not inspire wonder is barren Wonder is commonly perceived as akin to curiosity as stimulating inquiry and as something that enhances pleasure in learning but there are many experiences of wonder that do not have an obvious place in education In Wonder and Education Anders Schinkel theorises a kind of wonder with less obvious yet fundamental educational importance which he calls contemplative wonder Contemplative wonder disrupts frameworks of understanding that are taken for granted and perceived as natural and draws our attention to the world behind our constructions sparking our interest in the world as something worth attending to for its own sake rather than for our purposes It opens up space for the consideration of radical alternatives wherever it occurs and in many cases is linked with deep experiences of value therefore it is not just important for education in general but also more specifically for moral and political education

Wonder-Full Education Kieran Egan,Annabella I. Cant,Gillian Judson,2013-07-24 For many children much of the time their experience in classrooms can be rather dull and yet the world the school is supposed to initiate children into is full of wonder This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults teachers and curriculum makers and how to keep it alive in children Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms The authors do not wax flowery they present strong arguments based on either research or precisely described experience and demonstrate how this argument can be seen to work itself out in daily practice The emphasis is not on ways of evoking wonder that might require virtuoso teaching but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms

school Slowly Auggie manages to tear down the walls at his school and becomes just one of the kids By the end he has not only survived middle school but overcome it Wonder is a story of one boy s identity and showing how normal he truly is

Education Aimee Beaulieu Schmidt,2022 The question of how musical coordination in a school wind band is addressed by pedagogues was qualitatively reconstructed using videographic interaction analysis A process of Hervorhebungspraktik practice of highlighting was observed which gradually brought musical elements out of their temporal context and into collective perception allowing both atmospheric interaction with content and the growth of professional vision A process of deconstruction and reintegration takes place as musical elements now present in collective consciousness withdraw back into the piece as a whole This necessitates an educational approach emphasizing not only the elements themselves but the relationships between them The realms of edusemiotics and phenomenology give us a pragmatic way in both a Deweyan and a Peircean sense to approach learning in music making that goes beyond the idea of co constructivism as content with agency teacher and student participate in coordinative interaction Aimee Beaulieu Schmidt is a native Texan with teaching experience in American and German public education As a band director and orchestral musician she has helped build music education programs on two continents She lives with her husband and two daughters near Frankfurt Germany Her research focuses on musical coordination edusemiotics and qualitative video analysis Aimee Beaulieu Schmidt is a native Texan with teaching experience in American and German public education As a band director and orchestral musician she has helped build music education programs on two continents She lives with her husband and two daughters near Frankfurt Germany Her research focuses on musical coordination edusemiotics and qualitative video analysis **Topics and Trends in**
