The Year Everything Changed A Novel:

The Eve of Destruction James T. Patterson, 2012-11-27 At the beginning of 1965 the U S seemed on the cusp of a golden age Although Americans had been shocked by the assassination in 1963 of President Kennedy they exuded a sense of consensus and optimism that showed no signs of abating Indeed political liberalism and interracial civil rights activism made it appear as if 1965 would find America more progressive and unified than it had ever been before In January 1965 President Lyndon Johnson proclaimed that the country had no irreconcilable conflicts Johnson who was an extraordinarily skillful manager of Congress succeeded in securing an avalanche of Great Society legislation in 1965 including Medicare immigration reform and a powerful Voting Rights Act But as esteemed historian James T Patterson reveals in *The Eve of Destruction* that sense of harmony dissipated over the course of the year As Patterson shows 1965 marked the birth of the tumultuous era we now know as The Sixties when American society and culture underwent a major transformation Turmoil erupted in the American South early in the year when police attacked civil rights demonstrators in Selma Alabama Many black leaders outraged began to lose faith in nonviolent and interracial strategies of protest Meanwhile the U S rushed into a deadly war in Vietnam inciting rebelliousness at home On August 11th five days after Johnson signed the Voting Rights Act racial violence exploded in the Watts area of Los Angeles The six days of looting and arson that followed shocked many Americans and cooled their enthusiasm for the president's remaining initiatives As the national mood darkened the country became deeply divided By the end of 1965 a conservative resurgence was beginning to redefine the political scene even as developments in popular music were enlivening the Left In *The Eve of Destruction* Patterson traces the events of this transformative year showing how they dramatically reshaped the nation and reset the course of American life **The Book**

Monsters in the Machine Steffen Hantke, 2016-06-20 During the 1950s and early 1960s the American film industry produced a distinct cycle of films situated on the boundary between horror and science fiction Using the familiar imagery of science fiction from alien invasions to biological mutation and space travel the vast majority of these films subscribed to the effects and aesthetics of horror film anticipating the dystopian turn of many science fiction films to come Departing from projections of American technological awe and optimism these films often evinced paranoia unease fear shock and disgust Not only did these movies address technophobia and its psychological social and cultural corollaries they also returned persistently to the military as a source of character setting and conflict Commensurate with a state of perpetual mobilization the US military comes across as an inescapable presence in American life Regardless of their genre Steffen Hantke argues

that these films have long been understood as allegories of the Cold War. They register anxieties about two major issues of the time: atomic technologies, especially the testing and use of nuclear weapons, as well as communist aggression and subversion. Setting out to question, expand, and correct this critical argument, Hantke follows shifts and adjustments prompted by recent scholarly work into the technological, political, and social history of America in the 1950s. Based on this revised historical understanding, science fiction films appear in a new light as they reflect on the troubled memories of World War II, the emergence of the military industrial complex, the postwar rewriting of the American landscape, and the relative insignificance of catastrophic nuclear war compared to America's involvement in postcolonial conflicts around the globe.
