Theories of War and Peace, 1998 **Theories of War and Peace** Michael E. Brown, 1998 New approaches to understanding war and peace in the changing international system **Dimensions of Peace and Security** Gustaaf Geeraerts, Natalie Pauwels, Éric Remacle, 2006 The terrorist attacks of September 11th 2001 on the United States provoked a significant shift in thinking about peace and security and much has since been written about new security threats and challenges This collection of essays revisits some of the more traditional concepts of peace and security that remain valid and pertinent today despite having ceded much of the limelight to the major security preoccupations of the current era international terrorism weapons of mass destruction rogue states and related phenomena The book covers numerous salient topics from arms production monitoring and control to disarmament and conversion through to peacekeeping and conflict prevention The contributions differ in scope form and analysis ranging from historical and philosophical to contemporary and political perspectives and approaches to peace and security Human Security in East Asia Sorpong Peou, 2008-11-19 Since the end of the Cold War the number of interstate wars has remained relatively low although whilst states may be more secure than ever this does not mean that individual human beings are too This has led to a growing recognition of the importance of human security in contrast to the traditional realist focus on state security This book explores human security in East Asia focusing in particular on the challenges to collaboration among actors involved in the process of human security promotion It examines the theoretical complexities of conceptual arguments about human security drawing on the ideas of scholars from Asia and the West to provide a global perspective on what causes human insecurity and how security can best be achieved It considers in detail case studies of military interventions in East Asia in particular East Timor and assesses how successful collaborative efforts have been in providing human security It also explores case studies of non military intervention including international criminal justice in Cambodia and East Timor It discusses the relationship of regional great powers such as China and Japan to human security promotion arguing that it will be better served if these powers engage less in the traditional game of geopolitics and if human security objectives do not work against actors interests It shows how interventions to uphold human security have not always succeeded to the extent that was hoped despite the best of intentions and considers how improved collaboration can be achieved so that future interventions enjoy more consistent success

The Realism Reader Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism s engagement with critiques levelled by liberalism institutionalism and constructivism

and the English School The final section of the book provides materials on realism s engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism **War & Peace** ,1913
