Claus Otto Scharmer, 2007 In this book Otto Scharmer invites us to see the world in new ways Fundamental problems as Einstein once noted cannot be solved at the same level of thought that created them What we pay attention to and how we pay attention both individually and collectively is key to what we create What often prevents us from attending is what Scharmer calls our blind spot the inner place from which each of us operates Learning to become aware of our blind spot is critical to bringing forth the profound systemic changes so needed in business and society today First introduced in Presence the U methodology of leading profound change is expanded and deepened in Theory U By moving through the U process we learn to connect to our essential Self in the realm of presencing a term coined by Scharmer that combines the present with sensing Here we are able to see our own blind spot and pay attention in a way that allows us to experience the opening of our minds our hearts and our wills This wholistic opening constitutes a shift in awareness that allows us to learn from the future as it emerges and to realize that future in the world Theory U explores a new territory of scientific research and personal leadership one that is grounded in real life experience and shared practices Scharmer shares much from his own personal and professional development and draws from a rich diversity of compelling stories and examples book jacket **Theory U**

The Moral Dynamics of Economic Life Daniel K. Finn, 2012-05-31 Caritas in veritate Charity in Truth is the social encyclical of Pope Benedict XVI one of many papal encyclicals over the last 120 years that address economic life This volume based on discussions at a symposium co-sponsored by the Institute for Advanced Catholic Studies and the Pontifical Council for Justice and Peace analyzes the situation of the Church and the theological basis for Benedict's thinking about the person community and the globalized economy The Moral Dynamics of Economic Life engages Benedict's analysis of relation the characteristics of contemporary social and economic relationships and the implications of a relational Trinitarian God for daily human life Crucial here is the Pope's notion of reciprocity an economic relationship characterized by help freely given

but which forms an expectation that the recipient will reciprocate either to the donor or often to someone else This logic of gift Benedict argues should influence daily economic life especially within what he calls hybrid firms which make a profit and invest a share of that profit in service to needs outside the firm Similarly development whether of an individual or of a nation must be integral neither simply economic nor personal nor psychological nor spiritual but a comprehensive development that engages all dimensions of a flourishing human life The essays written by social scientists theologians policy analysts and others engage extend and critique Benedict's views on these issues as well as his call for deeper dialogue and a morally based transformation of social and economic structures

Thinking Seriously about Youth Work, and how to Prepare People to Do it Council of Europe, 2017 If we consider the 50 states having ratified the European Cultural Convention of the Council of Europe or the member states of the European Union the multiple and divergent nature of the realities theories concepts and strategies underlying the expression youth work becomes evident Across Europe youth work takes place in circumstances presenting enormous differences with regard to opportunities support structures recognition and realities and how it performs reflects the social cultural political and economic context and the value systems in which it is undertaken By analysing theories and concepts of youth work and by providing insight from various perspectives and geographical and professional backgrounds the authors hope to further contribute to finding common ground for and thus assure the quality of youth work in general Presenting its purified and essential concept is not the objective here The focus rather is on describing how to provide opportunities for all young people to shape their own futures as Peter Lauritzen described the fundamental mission of youth work The best way to do this remains an open question This Youth Knowledge book tries to find some answers and strives to communicate the strengths capacities and impact of youth work to those within the youth sector and those beyond to those familiar with its concepts and those new to this field all the while sharing practices and insights and encouraging further reflection

Wendy Petersen Boring, William Forbes, William Forbes (Professor of geography), 2013 American colleges and universities have been relatively quick to address the challenge of sustainability in operations Ironically they have been slower to respond in regard to their core mission educating students Teaching sustainability aims to redress this shortcoming by opening doors to education for sustainability in the humanities and social sciences The essays in this collection are richly diverse They investigate ways sustainability education pushes back against traditional disciplines while it simultaneously benefits from the perspectives and skills these fields have to offer They also address big questions such as how to make education meaningful how to examine hidden assumptions underlying current curricula and how a focus on sustainability can answer critics of contemporary higher education The heart of teaching sustainability is reflection and advice on pedagogy From these richly diverse case studies important common themes emerge the symbiotic relationship between classroom and campus operations techniques for transforming the campus itself from merely a setting to a learning laboratory and the potential of community partners for teaching sense of place An equally significant theme is the overlap between sustainability education and emerging best practice in pedagogy Essays on theory and practice individual and collaborative projects service learning and consequential activities all exemplify how sustainability and deep learning go hand and hand Like sustainability itself the volume infuses theory with practical application The contributors demonstrate the ways in which a single course can serve as a powerful change agent for an entire campus how to build bridges between faculty and administrators and even how to move forward on modest budgets The authors themselves constitute a network of advisors Publisher s description
