

■ How to install

 Prohibited	 Warning Do not install or operate the inverter if it is damaged or any component is missing. This can result in electric shock or fire. Call your Toshiba distributor for repairs.
 Mandatory action	- Mount the inverter on a metal plate. - The rear panel gets very hot. Do not install in an inflammable object; this can result in fire. - Do not operate with the terminal block cover removed. This can result in electric shock. - An emergency stop device must be installed that fits with system specifications (e.g. shut off input power when engage mechanical brakes). - Operation cannot be stopped immediately by the inverter alone, thus, resulting in an accident or injury. - All options used must be those specified by Toshiba. - The use of any other option will result in an accident.
 Mandatory action	 Caution - The main unit must be installed on a base that can bear the unit's weight. - If braking is necessary (to hold motor shaft), install a mechanical brake. - The brake on the inverter will not function as a mechanical hold, and if used for that purpose, injury will result.

(1) Normal installation

Select an indoor location with good ventilation, and then install it upright on a flat metal plate. When installing multiple inverters, leave at least 3 cm of space between each inverter and install them aligned horizontally.

When using the inverter in locations with temperatures above 40°C, remove the protective label on the top of the inverter and use the inverter with the output current reduced according to section 6.1B.

(2) Side-by-side installation

To align the inverters side-by-side horizontally, remove the protective label on the top of the inverter before use. When using the inverter in locations with temperatures above 40°C, use the inverter with the output current reduced.

If the door is opened 90° or more, please open the door with the left side inverter's door open when the same capacity inverters are installed with side-by-side.
