Wetland and Riparian Areas of the Intermountain West Mark C. McKinstry, Wayne A. Hubert, Stanley H.

Anderson, 2004-07-01 Wetlands and riparian areas between the Rocky Mountains and the Sierra Nevada are incredibly diverse and valuable habitats More than 80 percent of the wildlife species in this intermountain region depend on these wetlands which account for less than 2 percent of the land area for their survival At the same time the wetlands also serve the water needs of ranchers and farmers recreationists vacation communities and cities It is no exaggeration to call water the liquid gold of the West and the burgeoning human demands on this scarce resource make it imperative to understand and properly manage the wetlands and riverine areas of the Intermountain West This book offers land managers biologists and research scientists a state of the art survey of the ecology and management practices of wetland and riparian areas in the Intermountain West Twelve articles examine such diverse issues as laws and regulations affecting these habitats the unique physiographic features of the region the importance of wetlands and riparian areas to fish wildlife and livestock the ecological function of these areas their value to humans and the methods to evaluate these habitats The authors also address the human impacts on the land from urban and suburban development mining grazing energy extraction recreation water diversions and timber harvesting and suggest ways to mitigate such impacts In addition to the editors the contributors to this volume are Paul Adamus Oregon State University Corvallis Michael A Bozek University of Wisconsin Stevens Point Robert C Ehrhart Oregon State University Bend James H Gammonley Colorado Division of Wildlife Fort Collins Paul L Hansen Bitterroot Restoration Corvallis Montana E Andrew Hart University of Wyoming Laramie Murray K Laubhan U S Geological Survey Fort Collins Colorado Kirk Lohman University of Idaho Moscow James R Lovvorn University of Wyoming Laramie Neal D Niemuth University of Wisconsin Stevens Point Richard A Olson University of Wyoming Laramie Neil F Payne University of Wisconsin Stevens Point Mark A Rumble U S Department of Agriculture Forest Service Rocky Mountain Research Station Rapid City South Dakota Maureen Ryan University of Toledo Ohio College of Law Brian E Smith U S Geological Survey Northern Prairie Wildlife Research Center Jamestown North Dakota Mark Squillace University of Toledo Ohio College of Law Stephen A Tessmann Wyoming Game and Fish Department Cheyenne David W Willis South Dakota State University Brookings

Koehler, 2000 This annotated bibliography contains 1 905 citations from professional journals symposia workshops proceedings technical reports and other sources The intent of this compilation was to 1 assemble to the extent possible all available and accessible publications relating to riparian management within a single source or document 2 provide managers field biologists researchers and others a point of access for locating scientific literature relevant to their specific interest and 3 provide under one cover a comprehensive collection of annotated publications that could disseminate basic information relative to the status of our knowledge **Annual Technical Report** Aberdeen Plant Materials Center (U.S.), 2000 **Mountains**

**and Plains** Dennis H. Knight, George P. Jones, William A. Reiners, William H. Romme, 2014-01-01 Many changes some discouraging others hopeful have occurred in the Rocky Mountain region since the first edition of this widely acclaimed book was published Wildlife habitat has become more fragmented once abundant sage grouse are now scarce and forest fires occur more frequently At the same time wolves have been successfully reintroduced and new approaches to conservation have been adopted For this updated and expanded Second Edition the authors provide a highly readable synthesis of research undertaken in the past two decades and address two important questions How can ecosystems be used so that future generations benefit from them as we have How can we anticipate and adapt to climate changes while conserving biological diversity Rangeland Wildlife Ecology and Conservation Lance B. McNew, David K. Dahlgren, Jeffrey L. Beck, 2023-09-01 This open access book reviews the importance of ecological functioning within rangelands considering the complex inter relationships of production agriculture ecosystem services biodiversity and wildlife habitat More than half of all lands worldwide and up to 70% of the western USA are classified as rangelands uncultivated lands that often support grazing by domestic livestock The rangelands of North America provide a vast array of goods and services including significant economic benefit to local communities while providing critical habitat for hundreds of species of fish and wildlife This book provides compendium of recent data and synthesis from more than 100 experts in wildlife and rangeland ecology in Western North America It provides a current and in depth synthesis of knowledge related to wildlife ecology in rangeland ecosystems and the tools used to manage them to serve current and future wildlife biologists and rangeland managers in the working landscapes of the West The book also identifies information gaps and serves as a jumping off point for future research of wildlife in rangeland ecosystems While the content focuses on wildlife ecology and management in rangelands of Western North America the material has important implications for rangeland ecosystems worldwide Riparian Reference Areas in Idaho Mabel Jankovsky-Jones, 1999 Idaho land managers and regulators need knowledge on riparian reference sites Reference sites are ecological controls that can be used to set meaningful management and regulatory goals Since 1984 the Idaho Conservation Data Center Boise ID has compiled information in a series of interrelated databases on the distribution and condition of riparian wetland and terrestrial plant associations in high quality reference sites in Idaho This report summarizes association specific and reference area specific information from our databases and presents a standardized classification of Idaho riparian and wetland plant associations Each plant association entry includes the current global and state conservation rank and the plant association s occurrence in reference areas if any This is followed by a summary of each reference area arranged by ecoregional Province and Section Summary information includes location management responsibility site description and a list of all riparian and wetland associations that occur in the area **Jack Morrow Hills Coordination Activity Plan for Public Lands Administered by the Bureau of Land Management, Rock Springs Field Office, Rock Springs** ,2000 Best Management Practices for Wetlands Within Colorado State Parks ,1996 **General**

Skillen,2020-08-10 Among American conservatives the right to own property free from the meddling hand of the state is one of the most sacred rights of all But in the American West the federal government owns and oversees vast patches of land complicating the narrative of western individualism and private property rights As a consequence anti federal government sentiment has animated conservative politics in the West for decades upon decades In This Land Is My Land James R Skillen tells the story of conservative rebellion ranging from legal action to armed confrontations against federal land management in the American West over the last forty years He traces the successive waves of conservative insurgency against federal land authority the Sagebrush Rebellion 1979 1982 the War for the West 1991 2000 and the Patriot Rebellion 2009 2016 and shows how they evolved from regional revolts waged by westerners with material interests in federal lands to a national rebellion against the federal administrative state Cumulatively Skillen explains how ranchers miners and other traditional users of federal lands became powerful symbols of conservative America and inseparably linked to issues of property rights gun rights and religious expression Not just a book about property rights battles over Western lands This Land is My Land reveals how the evolving land based conflicts in the West since the 1980s reshaped the conservative coalition in America a development that ultimately helped lead to the election of President Donald J Trump in 2016      *Proceedings RMRS.* ,1998      *Visitor Use Density and Wilderness Experience* Wayne A.
