

The image is a composite. The top half shows a city skyline, likely New York City, with several prominent skyscrapers like the Empire State Building and One World Trade Center. The sky is filled with dramatic, orange and yellow clouds from a sunset or sunrise. The bottom half of the image shows a large crowd of people, seen from behind, standing on a wooden pier or walkway that extends into a body of water. The water reflects the warm colors of the sky. The overall mood is contemplative and hopeful.

One can survive without  
trust. But living means having  
faith in others and Others.

## What It Means To Survive:

Darwinian Creativity and Memetics Maria Kronfeldner,2014-09-11 Maria Kronfeldner examines how Darwinism has been used to explain novelty and change in culture through the Darwinian approach to creativity and the theory of memes The first claims that creativity is based on a Darwinian process of blind variation and selection while the latter claims that culture is based on and explained by units memes that are similar to genes Both theories try to describe and explain mind and culture by applying Darwinism by way of analogies Kronfeldner shows that the analogies involved in these theories lead to claims that give either wrong or at least no new descriptions or explanations of the phenomena at issue Whereas the two approaches are usually defended or criticized on the basis that they are dangerous for our vision of ourselves this book takes a different perspective it questions the acuteness of these approaches Darwinian theory is not like a dangerous wolf hunting for our self image Far from it in the case of the two analogical applications addressed in this book Darwinian theory is shown to behave more like a disoriented sheep in wolf s clothing
