Seleucid Archival Texts in the Harvard Semitic Museum Wallenfels, 2023-07-03 The Harvard Semitic Museum possesses ten archival cuneiform tablets from Seleucid Uruk bearing the impressions of ninety five different metal finger rings and stone stamp seals Typically texts and seal impressions are treated exclusively of each other This volume treats for the first time sealed cuneiform tablets as integrated wholes It comprises two interconnected parts consisting of critical editions of the texts and a catalogue raisonne of the seal impressions A hand copy transliteration translation philological notes and a commentary treating the occurrences activities and seals of each person named in the light of some four hundred fifty other contemporary documents accompany each text Included with the seal impressions are measurements descriptions interpretive drawings photographs and comparanda as well as data identifying each seal s owner each occasion of its use and references to other seals used by each sealer where known In the index of Personal Names text citations and where possible seal catalogue numbers are provided for each entry Mathematics as a Tool Johannes Lenhard, Martin Carrier, 2017-04-04 This book puts forward a new role for mathematics in the natural sciences In the traditional understanding a strong viewpoint is advocated on the one hand according to which mathematics is used for truthfully expressing laws of nature and thus for rendering the rational structure of the world In a weaker understanding many deny that these fundamental laws are of an essentially mathematical character and suggest that mathematics is merely a convenient tool for systematizing observational knowledge The position developed in this volume combines features of both the strong and the weak viewpoint In accordance with the former mathematics is assigned an active and even shaping role in the sciences but at the same time employing mathematics as a tool is taken to be independent from the possible mathematical structure of the objects under consideration Hence the tool perspective is contextual rather than ontological Furthermore tool use has to respect conditions like suitability efficacy optimality and others There is a spectrum of means that will normally differ in how well they serve particular purposes The tool perspective underlines the inevitably provisional validity of mathematics any tool can be adjusted improved or lose its adequacy upon changing practical conditions Studien zur Altägyptischen Kultur Band 51 Jochem Kahl, Nicole Kloth, 2022-12-15 Inhalt Hartwig Altenm ller Neues zu den Schutzsymbolen der magischen Ziegel von
