What Is Music? Philip Alperson, 2010-11-01 **Thinking about Music** Lewis Eugene Rowell, 1983 This book is for readers who are insatiably curious about music students of music in the broadest sense of the word In this category I include those whose musical concerns are more humanistic than technical as well as those preparing for careers in music In a library system of classification Thinking About Music is apt to be filed under the heading Music Aesthetics history and problems of and that is a fair description Preface **Philosophy of Music** R. A. Sharpe, 2004 In a lively and engaging introduction to the aesthetics of music and the issues that illuminate musical listening understanding and practice R A Sharpe guides the reader through three key questions What is the work of music Can music have meaning Can music have value He anchors his discussion to examples from Western classical music and jazz and places it in the context of the historical background and philosophical thinking on music from the Ancient Greeks to Eduard Hanslick and Edmund Gurney Accounts of the philosophy of music often present it as a branch of metaphysics raising questions about sounds tones and musical movement Sharpe's non technical treatment is problem orientated and the questions he raises are about the value of music the individuality of our assessments and the way we prize music for its power to move us He argues that when it comes to music philosophical analysis has its limitations and it is no surprise that there are contradictions in the aesthetics of music or that our judgements about its value are not internally consistent *Introduction to a Philosophy of Music* Peter Kivy, 2002 Philosophy of music has flourished in the last thirty years with great advances made in the understanding of the nature of music and its aesthetics Peter Kivy has been at the center of this flourishing and now offers his personal introduction to philosophy of music a clear and lively explanation of how he sees the most important and interesting philosophical issues relating to music Anyone interested in music will find this a stimulating introduction to some fascinating questions and ideas [A Brief Introduction to A Philosophy of Music and Music Education as Social Praxis](#) Thomas A. facets of musical experience behavior and development in relation to this diverse variety of contexts In this first of two volumes an international list of contributors discuss a range of key issues and concepts associated with music learning and teaching The volume then focuses on these processes as they take place during childhood from infancy through adolescence and primarily in the school age years Exploring how children across the globe learn and make music and the skills and attributes gained when they do so these chapters examine the means through which music educators can best meet young people s musical needs The second volume of the set brings the exploration beyond the classroom and into later life Whether they are used individually or in tandem the two volumes of The Oxford Handbook of Music Education update and redefine the discipline and show how individuals across the world learn enjoy and share the power and uniqueness of music

Musical Meaning and Expression Stephen Davies, 1994 We talk not only of enjoying music but of understanding it Music is often taken to have expressive import and in

that sense to have meaning But what does music mean and how does it mean Stephen Davies addresses these questions in this sophisticated and knowledgeable overview of current theories in the philosophy of music Reviewing and criticizing the aesthetic positions of recent years he offers a spirited explanation of his own position Davies considers and rejects in turn the positions that music describes like language or depicts like pictures or symbolizes in a distinctive fashion emotions Similarly he resists the idea that music's expressiveness is to be explained solely as the composer's self-expression or in terms of its power to evoke a response from the audience Music's ability to describe emotions he believes is located within the music itself it presents the aural appearance of what he calls emotion characteristics The expressive power of music awakens emotions in the listener and music is valued for this power although the responses are sometimes ones of sadness Davies shows that appreciation and understanding may require more than recognition of and reaction to music's expressive character but need not depend on formal musicological training *Music in German Philosophy* Stefan Lorenz
