Drawing on his extensive experience as a collections manager, educator, consultant, and surveyor for the AAM's Museum Assessment Program, John E. Simmons reviews current ideas and literature on the subject, highlights the issues that collections management policies should address, and explains the pros and cons of choosing some policy options over others. In the second edition, coverage of several key areas is greatly expanded or new. Information includes digital collections, intellectual property rights, deaccessioning, and use of deaccessioning proceeds, laws, regulations, changes in standards, and benchmarks for collections care, the way US museums are funded and administered, and new standards and practices for collection storage environments.
