Thinking As Computation A First Course:

Thinking as Computation Hector J. Levesque, 2017-08-11 Students explore the idea that thinking is a form of computation by learning to write simple computer programs for tasks that require thought This book guides students through an exploration of the idea that thinking might be understood as a form of computation Students make the connection between thinking and computing by learning to write computer programs for a variety of tasks that require thought including solving puzzles understanding natural language recognizing objects in visual scenes planning courses of action and playing strategic games The material is presented with minimal technicalities and is accessible to undergraduate students with no specialized knowledge or technical background beyond high school mathematics Students use Prolog without having to learn algorithms Prolog without tears learning to express what they need as a Prolog program and letting Prolog search for answers After an introduction to the basic concepts Thinking as Computation offers three chapters on Prolog covering back chaining programs and queries and how to write the sorts of Prolog programs used in the book The book follows this with case studies of tasks that appear to require thought then looks beyond Prolog to consider learning explaining and propositional reasoning Most of the chapters conclude with short bibliographic notes and exercises The book is based on a popular course at the University of Toronto and can be used in a variety of classroom contexts by students ranging from first year liberal arts undergraduates to more technically advanced computer science students [A First Course in Computing and Numerical Methods](#) John Alfred Jacquez, 1970 *Data Structures and Algorithms: A First Course* Iain T. Adamson, 1996-08-06 All young computer scientists who aspire to write programs must learn something about algorithms and data structures This book does exactly that Based on lecture courses developed by the author over a number of years the book is written in an informal and friendly way specifically to appeal to students The book is divided into four parts the first on Data Structures introduces a variety of structures and the fundamental operations associated with them together with descriptions of how they are implemented in Pascal the second discusses algorithms and the notion of complexity Part III is concerned with the description of successively more elaborate structures for the storage of records and algorithms for retrieving a record from such a structure by means of its key and finally Part IV consists of very full solutions to nearly all the exercises in the book **A FIRST COURSE IN STATISTICS** E.F.
