Education and Thinking in Continental Philosophy

Itay Snir,2020-09-28 This book draws on five philosophers from the continental tradition Theodor Adorno Hannah Arendt Gilles Deleuze Jacques Derrida and Jacques Rancière in order to think about thinking and offer new and surprising answers to the question How can we educate students to think creatively and critically Despite their differences all of these philosophers challenge the modern understanding of thinking and offer original radical perspectives on it In very different ways each rejects the modern approach to thinking as well as the reduction of proper thought to rationality situating thinking in sociohistorical reality and relating it to political action Thinking they argue is not a natural automatic activity and the need to think has become all the more important as political reality seems to exhibit less thinking or to even celebrate thoughtlessness Bringing these continental conceptions of thinking to bear on the urgent need to educate young people to think against the current this book makes a significant contribution to educational theory and political philosophy one that is particularly relevant in today's anti intellectual climate

The Art of Philosophy Susanna Berger,2017-02-28 The first book to explore the role of images in philosophical thought and teaching in the early modern period Delving into the intersections between artistic images and philosophical knowledge in Europe from the late sixteenth to the early eighteenth centuries The Art of Philosophy shows that

the making and study of visual art functioned as important methods of philosophical thinking and instruction From frontispieces of books to monumental prints created by philosophers in collaboration with renowned artists Susanna Berger examines visual representations of philosophy and overturns prevailing assumptions about the limited function of the visual in European intellectual history Rather than merely illustrating already existing philosophical concepts visual images generated new knowledge for both Aristotelian thinkers and anti Aristotelians such as Descartes and Hobbes Printmaking and drawing played a decisive role in discoveries that led to a move away from the authority of Aristotle in the seventeenth century Berger interprets visual art from printed books student lecture notebooks alba amicorum friendship albums broadsides and paintings and examines the work of such artists as Pietro Testa L onard Gaultier Abraham Bosse D rer and Rembrandt In particular she focuses on the rise and decline of the plural image a genre that was popular among early modern philosophers Plural images brought multiple images together on the same page often in order to visualize systems of logic metaphysics natural philosophy or moral philosophy Featuring previously unpublished prints and drawings from the early modern period and lavish gatefolds *The Art of Philosophy* reveals the essential connections between visual commentary and philosophical thought

God and the Self in Hegel Paolo Diego Bubbio,2017-06-29 God and the Self in Hegel proposes a reconstruction of Hegel s conception of God and analyzes the significance of this reading for Hegel s idealistic metaphysics Paolo Diego Bubbio argues that in Hegel s view subjectivism the tenet that there is no underlying true reality that exists independently of the activity of the cognitive agent can be avoided and content can be restored to religion only to the extent that God is understood in God s relation to human beings and human beings are understood in their relation to God Focusing on traditional problems in theology and the philosophy of religion such as the ontological argument for the existence of God the Trinity and the death of God Bubbio shows the relevance of Hegel s view of religion and God for his broader philosophical strategy In this account as a response to the fundamental Kantian challenge of how to conceive the mind world relation without setting mind over and against the world Hegel has found a way of overcoming subjectivism in both philosophy and religion

Negative Theology Johannes Aakjær Steenbuch,2022-09-23 How do we speak about God if God is ineffable This paradoxical question lies at the heart of one of the strangest traditions of philosophical and theological thought negative theology As a tradition of thought negative or apophatic theology can be traced back to the convergence of Greek philosophy with Jewish and Christian theology in the first century CE Beginning with a seemingly simple claim about the ineffability or unsayability of God negative theology evolved into a complex tradition of thought and spirituality Today together with a growing interest in patristic and medieval

Violence and the Philosophical Imaginary Ann V. Murphy, 2012-04-11 Images of violence enjoy a particular privilege in contemporary continental philosophy one manifest in the ubiquity of violent metaphors and the prominence of a kind of rhetorical investment in violence as a motif Such images have also informed constrained and motivated recent continental feminist theory In *Violence and the Philosophical Imaginary* Ann V Murphy takes note of wide ranging references to the themes of violence and vulnerability in contemporary theory She considers the ethical and political implications of this language of violence with the aim of revealing other ways in which identity and the social bond might be imagined and encourages some critical distance from the images of violence that pervade philosophical critique
