National Forest Inventory NFI is a forest survey on national level which started in 1982 and has already reached its 5th  
survey cycle NFI5 It can be characterized as a multisource and multipurpose inventory where information is mainly collected  
from terrestrial field surveys using permanent sample plots In addition data from aerial photography GIS and forest service  
questionnaires are also included The NFI s main objective is to provide statistically reliable and sound figures to stakeholders  
such as politicians researchers ecologists forest service timber industry national and international organizations as well as to  
international projects such as the Forest Resources Assessment of the United Nations For Switzerland NFI results are  
typically reported on national and regional level State of the art methods are applied in all fields of data collection which  
have been proven to be of international interest and have even served as a basis for other European NFIs The presented  
methods are applicable to any sample based forest inventory around the globe In 2001 the Swiss NFI published its methods  
for the first time Since then many methodological changes and improvements have been introduced This book describes the  
complete set of methods and revisions since NFI2 It covers various topics ranging from inventory design and statistics to  
remote sensing field survey methods and modelling It also describes data quality concepts and the software framework used
