Norms in Conflict Anchalee Rüland, 2022-06-14 The people of Myanmar were struck by three major human rights disasters during the country's period of democratization from 2003 to 2012: the 2007 Saffron Revolution, the aftermath of Cyclone Nargis in 2008, and the 2012 Rakhine riots which would evolve into the ongoing Rohingya crisis. These events saw Myanmar's government categorically labeled as an offender of human rights, and three powerful Southeast Asian member states—Indonesia, Thailand, and Malaysia—responded to the violations in very different ways. In each case, their responses to the crises were explicitly shaped by norm conflict, which may be understood as a tension between international and domestic norms. Their reactions were compelled by a need to address conflicting domestic and international expectations for norm compliance regarding human rights protection and non-interference in internal affairs.

In *Norms in Conflict: Southeast Asia's Response to Human Rights Violations in Myanmar*, Anchalee Rüland makes sense of state action that occurs when a governing body is faced with a circumstance that is at once in line with and contrary to its own governing policies. She defines five different types of response strategies to situations of norm conflict and examines the enabling factors that lead to each strategy. Domestic norms are known to evolve as a country's values change over time, yet Rüland argues that the old and new norms may also coexist. Knowledge of the underlying political context is crucial for those seeking a solid understanding of state behavior. *Norms in Conflict* challenges the conventional understanding of the logic of

consequences in determining state behavior advancing constructivist theory and establishing a provocative new conversation in international relations discourse **Los grandes problemas de México. Tomo 12. Relaciones internacionales**

Blanca Torres y Gustavo Vega, coordinadores, *Global Energy Security and American Hegemony* Doug Stokes, Sam Raphael, 2010-06-07 This analysis of the United States and energy security examines the close relationship between US military supremacy in oil rich regions and America's maintenance of global power Energy security generally evokes thoughts of American intervention in the Middle East to protect US interests in that region's oil rich fields Doug Stokes and Sam Raphael move beyond that framework to consider US actions in Latin America Central Asia and Africa Drawing on State and Defense Department records and other primary sources and previous scholarship they show how US foreign policy since World War II has sought to maintain a global energy security regime that supports the nation's allies while maintaining American hegemony Stokes and Raphael explain how US intervention in energy rich states insulates and stabilizes those nations transnationally oriented actors and political economies and why American oil diversification strategy strengthens the country's position against rivals in the global capitalist system They argue that counterinsurgency aid and other types of coercive US statecraft protect the recipient states from an array of potentially revolutionary armed and unarmed internal social forces thereby securing the energy supplies of nations deemed strategically important to the United States or its allies Clear and accessible this cutting edge contemporary policy analysis will engage scholars of US foreign policy and international relations as well as policymakers grappling with the importance of energy security in today's world The Trouble with the Congo Séverine Autesserre, 2010-06-14 The Trouble with the Congo suggests a new explanation for international peacebuilding failures in civil wars Drawing from more than 330 interviews and a year and a half of field research it develops a case study of the international intervention during the Democratic Republic of the Congo's unsuccessful transition from war to peace and democracy 2003 2006 Grassroots rivalries over land resources and political power motivated widespread violence However a dominant peacebuilding culture shaped the intervention strategy in a way that precluded action on local conflicts ultimately dooming the international efforts to end the deadliest conflict since World War II Most international actors interpreted continued fighting as the consequence of national and regional tensions alone UN staff and diplomats viewed intervention at the macro levels as their only legitimate responsibility The dominant culture constructed local peacebuilding as such an unimportant unfamiliar and unmanageable task that neither shocking events nor resistance from select individuals could convince international actors to reevaluate their understanding of violence and intervention Democracy in Retreat Joshua Kurlantzick, 2013-03-19 DIV Since the end of the Cold War the assumption among most political theorists has been that as nations develop economically they will also become more democratic especially if a vibrant middle class takes root This assumption underlies the expansion of the European Union and much of American foreign policy bolstered by such examples as South Korea the Philippines Taiwan and even to some extent Russia

Where democratization has failed or retreated aberrant conditions take the blame Islamism authoritarian Chinese influence or perhaps the rise of local autocrats

But what if the failures of democracy are not exceptions In this thought provoking study of democratization Joshua Kurlantzick proposes that the spate of retreating democracies one after another over the past two decades is not just a series of exceptions Instead it reflects a new and disturbing trend democracy in worldwide decline The author investigates the state of democracy in a variety of countries why the middle class has turned against democracy in some cases and whether the decline in global democratization is reversible

The Peace In Between Astri Suhrke, Mats Berdal, 2013-03-01 This volume examines the causes and purposes of post conflict violence The end of a war is generally expected to be followed by an end to collective violence as the term post conflict that came into general usage in the 1990s signifies In reality however various forms of deadly violence continue and sometimes even increase after the big guns have been silenced and a peace agreement signed Explanations for this and other kinds of violence fall roughly into two broad categories those that stress the legacies of the war and those that focus on the conditions of the peace There are significant gaps in the literature most importantly arising from the common premise that there is one predominant type of post war situation This post war state is often endowed with certain generic features that predispose it towards violence such as a weak state criminal elements generated by the war time economy demobilized but not demilitarized or reintegrated ex combatants impunity and rapid liberalization The premise of this volume differs It argues

that features which constrain or encourage violence stack up in ways to create distinct and different types of post war environments Critical factors that shape the post war environment in this respect lie in the war to peace transition itself above all the outcome of the war in terms of military and political power and its relationship to social hierarchies of power normative understandings of the post war order and the international context This book will of much interest to students of war and conflict studies peacebuilding and IR Security Studies in general

Selling Justice Short Sara Darehshori,Human Rights Watch (Organization),2009 This 128 page report draws upon Human Rights Watch s work over the past 20 years in nearly 20 countries The report documents how ignoring atrocities reinforces a culture of impunity that encourages future abuses Rather than impede negotiations or a transition to peace remaining firm on justice can yield short and long term benefits Anticipated negative consequences of pressing for accountability often do not come to pass Justice is also important as a matter of principle Fair trials may assist in restoring dignity to victims by acknowledging their suffering Publisher description
