Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes Worlds of History, Volume I: To 1550 Kevin Reilly, 2013-01-04 Worlds of History offers a flexible comparative and thematic organization that accommodates a variety of teaching approaches and helps students to make cross cultural comparisons Thoughtfully compiled by a distinguished world historian and community college instructor each chapter presents a wide array of primary and secondary sources arranged around a major theme such as universal religions the environment and technology or gender and family across two or more cultures
