Thieves Of State Why Corruption Threatens Global Security:

Thieves of State Sarah Chayes, 2014-12-29 Winner of the 2015 Los Angeles Times Book Prize for Current Interest I can't imagine a more important book for our time Sebastian Junger The world is blowing up Every day a new blaze seems to ignite the bloody implosion of Iraq and Syria the East West standoff in Ukraine abducted schoolgirls in Nigeria Is there some thread tying these frightening international security crises together In a riveting account that weaves history with fast moving reportage and insider accounts from the Afghanistan war Sarah Chayes identifies the unexpected link corruption Since the late 1990s corruption has reached such an extent that some governments resemble glorified criminal gangs bent solely on their own enrichment These kleptocrats drive indignant populations to extremes ranging from revolution to militant puritanical religion Chayes plunges readers into some of the most venal environments on earth and examines what emerges Afghans returning to the Taliban Egyptians overthrowing the Mubarak government but also redesigning Al Qaeda and Nigerians embracing both radical evangelical Christianity and the Islamist terror group Boko Haram In many such places rigid moral codes are put forth as an antidote to the collapse of public integrity The pattern moreover pervades history Through deep archival research Chayes reveals that canonical political thinkers such as John Locke and Machiavelli as well as the great medieval Islamic statesman Nizam al Mulk all named corruption as a threat to the realm In a thrilling argument connecting the Protestant Reformation to the Arab Spring Thieves of State presents a powerful new way to understand global extremism And it makes a compelling case that we must confront corruption for it is a cause not a result of global instability

Global Politics and Violent Non-state Actors Natasha Ezrow, 2017-03-13 Moving beyond terror groups to examine non state actors including warlords gangs and private security companies Violent Non State Actors Guides you through the core theories and concepts taking a multidisciplinary approach Examines different explanations for the emergence of violent non state actors as well as strategies for dealing with them Weaves in international case studies from groups including the Islamic State Los Zetas Hamas and Al Qaeda as well as discussion questions further reading and definitions of key terms A must read for upper level undergraduate and postgraduate students in politics international relations security and terrorism studies

Corruption, Social Sciences and the Law Jane Ellis, 2019-04-25 The problem of corruption however described dates back thousands of years Professionals working in areas such as development studies economics and political studies were the first to most actively analyse and publish on the topic of corruption and its negative impacts on economies societies and politics There was at that time minimal literature available on corruption and the law The literature and discussion on bribery and corruption as well as on the negative impact of each and what is required to address them particularly in the legal context are now considerable Corruption and anti corruption are multifaceted and multi disciplinary The focus now on the law and compliance and perhaps commercial incentives is relatively easy However corruption anti corruption and the motivations for them are complex If we continue to discuss debate engage address corruption and anti corruption in our own

disciplinary silos we are unlikely to significantly progress the fight against corruption What do terms such as culture of integrity demand accountability transparency and accountability and ethical corporate culture dominating the anti corruption discourse mean if anything in other disciplines If they are meaningless what approach would practitioners in those other disciplines suggest be adopted to address corruption What has their experience been in the field How can the work of each discipline contribute to the work of whole and as such improve our work in and understanding of anti corruption This book seeks to answer these questions and to understand the phenomenon more comprehensively It will be of value to researchers academics lawyers legislators and students in the fields of law anthropology sociology international affairs and business

Unwinnable Theo Farrell, 2017-09-07 Afghanistan was an unwinnable war As British and American troops withdraw discover this definitive account that explains why It could have been a very different story British forces could have successfully withdrawn from Afghanistan in 2002 having done the job they set out to do to defeat al Qaeda Instead in the years that followed Britain paid a devastating price for their presence in Helmand province So why did Britain enter and remain in an ill fated war Why did it fail so dramatically and was this expedition doomed from the beginning Drawing on unprecedented access to military reports government documents and senior individuals Professor Theo Farrell provides an extraordinary work of scholarship He explains the origins of the war details the campaigns over the subsequent years and examines the West's failure to understand the dynamics of local conflict and learn the lessons of history that ultimately led to devastating costs and repercussions still relevant today The best book so far on Britain's war in Afghanistan International Affairs Masterful irrefutable Farrell records all these military encounters with the irresistible pace of a novelist Sunday Times

Mavericks of War Jason S Ridler, 2023-06-14 A military historian sheds light on the maverick thinkers who hatched outlandish plots and shaped warfare from WWI to Vietnam and beyond During World War I Oxford trained archeologist Lawrence of Arabia used his knowledge of the Middle East to help organize the Arab revolt against the Ottoman Empire In this entertaining and insightful book Jason Ridler profiles the intellectuals outsiders and eccentrics who followed in Lawrence's footsteps across the next hundred years of warfare those who relied on creativity curiosity and outside the box thinking to shape battlefields from World War II and Vietnam to Iraq and Afghanistan These men were Ivy Leaguers and Oxford scholars anthropologists and archeologists Among them were an ad executive an international activist a Peace Corps veteran an migr journalist and former teenage member of the French Resistance and a diplomat These mavericks and oddballs both men and women were not always heralded or heeded and sometimes they were hated But they each challenged traditional military thought and helped win wars secure peace and change the face of modern military conflict **Rebel Law** Frank

Ledwidge, 2017-05-15 In most societies courts are where the rubber of government meets the road of the people If a state cannot settle disputes and ensure that its decisions are carried out for practical purposes it is no longer in charge This is why successful rebels put courts and justice at the top of their agendas Rebel Law examines this key weapon in the armory of

insurgent groups ranging from the Ireland of the 1920s where the IRA sapped British power using Republican Tribunals to today's Caliphate of Law the Islamic State by way of Algeria in the 1950s and the Afghan Taliban Frank Ledwidge tells how insurgent courts bleed legitimacy from government decide cases and enforce judgments on the battlefield itself Astute counterinsurgents especially in ungoverned space can ensure that they retain the initiative The book describes French Turkish and British colonial judicial strategy and contrasts their experience with the chaos of more recent stabilization operations in Iraq and Afghanistan drawing lessons for contemporary counterinsurgents Rebel Law builds on his insights and shows that the courts themselves can be used as weapons for both sides in highly unconventional warfare **Reconceiving**

Religious Conflict Wendy Mayer, Chris L. de Wet, 2018-01-17 Reconceiving Religious Conflict deconstructs instances of religious conflict within the formative centuries of Christianity the first six centuries CE It explores the theoretical foundations of religious conflict the dynamics of religious conflict within the context of persecution and martyrdom the social and moral intersections that undergird the phenomenon of religious conflict and the relationship between religious conflict and religious identity It is unique in that it does not solely focus on religious violence as it is physically manifested but on religious conflict and tolerance looking too at dynamics of religious discourse and practice that often precede and accompany overt religious violence **On Corruption in America** Sarah Chayes, 2020 This is a Borzoi book published by Alfred A

Chayes, 2020-08-06 America is corrupted and everybody knows it In this blistering book Sarah Chayes brings years of experience analysing corruption in the developing world to probing her home country finding that the model fits too closely for comfort US kleptocratic networks have bent the main government powers to serve their own interests not the citizens with dizzying results from egregious Supreme Court decisions to the pillaging of the defence budget public land grabs to Big Pharma's capture of the Drug Enforcement Administration and the repeated financial meltdowns of the past forty years Chayes places America's acute corruption within a broad historical context going back to the invention of money itself She shows that corruption today far from just acts committed by disreputable individuals to line their pockets is the standard mode of operation for sophisticated networks crossing political ideological and national boundaries Even the Trump administration's venality is more a symptom of a widespread trend than an aberration When corruption takes hold the results are devastating social upheaval terror and extremism mass migration and environmental devastation Searching and unflinching **Everybody Knows** helps readers everywhere envision ways to pull in the reins on a rigged system through individual collective and political action
