Think Like A Futurist Know What Changes What Doesn't And What's Next:

Think Like a Futurist Cecily Sommers, 2012-10-09 Push past resistance to discover and own new business territories. Think Like a Futurist shows how to track changes, explore questions and engage in new thinking that connects today's pressures with tomorrow's realities. Cecily Sommers shows how to apply long-term focus and strategies to needs as diverse as industry forecasts, innovation challenges, leadership development or future proofing a brand. By understanding intersecting potentials that one day may impact your organization, you can readily spot emerging trends and market shifts, uncovering opportunities on the horizon. Think Like a Futurist explores such questions as: Where will new markets emerge over the next 5, 10, 25 years? What will be the big issues of the day? How will lifestyle, social mores and policy adapt? And what role do we play in that future? Offers a clear framework for thinking like a futurist and direction for how to integrate it in high-pressure corporate environments. Explains how the social, economic and environmental crises of our time spring from just four constant and predictable forces. Reveals the three dramatic disruptions on the horizon that should be a part of every strategic conversation. Written by Cecily Sommers, the Founder and President of The Push Institute, a non-profit think tank that tracks significant global trends and their implications for business, government and non-profit. Filled with tools and models for a new world, this book should be required reading for strategists and innovators across disciplines. Refreshing. A book that does not follow today's push to be innovative just to snag attention because of the current hot trending keyword. Matter of fact, Cecily Sommers' book works to get us away from simply identifying and going for a ride on the latest trends in our respective industries. Quite the contrary, rather than avoid a scientific or tactical discussion of trend identification, she works to give us the ability to go beyond trends and into the future. Cecily has drafted a book providing a nice blend of practical reality, philosophy and practical execution. It speaks well to current discussions about how to drive innovation or better creativity within your businesses, however large or small. All in this is a book 254 pages long including index that is written at a practical level that, after closer study following an initial read-through, provides a methodology for anticipating the future and taking action to meet it. Provides a methodology for anticipating the future and taking action to meet it. Think Like a Futurist is a good read for anyone struggling with how to move their organization forward. Business leaders, product and program managers, service providers will all find the concepts Cecily introduces to be well laid out with a reasonable amount of supporting content. Metamodern Leadership James Surwillo, 2017-07-11 Metamodern Leadership outlines the seven values that identify the character of our future leaders based on the circumstances that make the Millennial Generation who they are It is at once an attempt to implore youth to seize their potential by tying their values to ancient wisdom as well as a warning to everyone else to understand the impacts of disregarding the inevitable tendencies of a very distinct new demographic This is the untold story of the personal responsibility required of the Millennial Generation against the messaging and memes that portray them as entitled and lazy It is an optimistic and pragmatic interpretation on the leadership mandates in the near future The ancient virtue of leadership required broad knowledge as the basis for critical thinking and self examination The late twentieth century required myopic versions of leadership which neglected the truths of centuries of wisdom Our younger generations will lead and follow based on new foundations that seem counterintuitive to most yet will be the status quo within a decade This distinction will lead to pragmatism and problem solving for the future rather than the dogma and gridlock of today We will require a generation of leaders who can once again link the complexities of the future with the ancient wisdom of progress
