PWM Control of a Three Phase Inverter Using a Microcontroller Mohd Zaidi Sofian, 1998 Smart Grids for Smart Cities, Volume 1 O. V. Gnana Swathika, K. Karthikeyan, Sanjeevikumar Padmanaban, 2023-07-05 SMART GRIDS for SMART CITIES Written and edited by a team of experts in the field, this first volume in a two-volume set focuses on an interdisciplinary perspective on the financial, environmental, and other benefits of smart grid technologies and solutions for smart cities. What makes a regular electric grid a smart grid? It comes down to digital technologies that enable two-way communication between a utility and its customers, as opposed to the traditional electric grid where power flows in one direction. Based on statistics and available research, smart grids globally attract the largest investment venues in smart cities. Smart grids and city buildings that are connected in smart cities contribute to significant financial savings and improve the economy. The smart grid has many components, including controls, computers, automation, and new technologies and equipment working together. These technologies cooperate with the electrical grid to respond digitally to our quickly changing electric demand. The investment in smart grid technology also has certain challenges. The interconnected feature of smart grids is valuable, but it tremendously increases their susceptibility to threats. It is crucial to secure smart grids wherein many technologies are employed to increase real-time situational awareness and the ability to support renewables, as well as system automation to increase the reliability, efficiency, and safety of the electric grid. This exciting new volume covers all of these technologies, including the basic concepts and the problems and solutions involved with the practical applications in the real world. Whether for the veteran engineer or scientist, the student or a manager or other technician working in the field, this volume is a must-have for any library. **Information and Communication Technology for Competitive Strategies (ICTCS 2020)** Amit Joshi, Mufti Mahmud, Roshan G. Wen Feng, Lauric Garbuio, Hilfi Pardi, 2023-01-16 This book is the proceeding of the International Conference on Sustainable Engineering Development and Technological Innovation ICSEDTI 2022 that was successfully held on 11-13 October 2022 using a hybrid platform. The conference is themed Sustainable empowerment of innovative solutions through the development of integrated scientific researches to enhance the advanced technological world which represents our belief of how sustainability is essential in our approach to solve problems through technological innovation. A total of 56 papers were submitted and presented within the sessions of the conference. The papers' topics revolve around Informatics, Technology, Electrical Technology, Marine Technology, Manufacturing System and Technology, Mechanical Engineering, and also Information Industry and Management. In addition to the technical paper presentations, there were also five keynote speeches featured, and eight plenary talks were delivered. Two of the keynote speeches were delivered in person by Professor Selo from Universitas Gajah Mada Indonesia and Professor Goib Wiranto from the National Research and Innovation Agency Indonesia. The rest of the keynote speeches were delivered online by Professor Yvon Kermarrec from IMT Atlantique France, Professor Ian Gibson from University of Twente, Netherlands, and Dr. Ilham Akbar Habibie from The Association of Indonesian Engineer Indonesia. It was a great pleasure to work with the technical program committee led by Mr. Hilfi Pardi, who have completed the imperative process of peer review on the technical papers submitted in this conference. We are also very fortunate to have on our side the excellent organizing committee team of the Faculty of Engineering of UMRH who work very hard to organize and support the conference. Finally, our appreciation to all the authors who have participated in this conference with their amazing achievements and enthusiasm. We firmly believe that ICSEDTI is a suitable platform for researchers, engineers, and developers who are concerned with sustainability in engineering and technological development. We hope in the coming years ICSEDTI will be better in terms of the organization of the conference, the quantity, and the quality of the researches submitted, and most importantly, the impact on the sustainability of technological innovation.
