

A watercolor-style map of North America, including Canada, the United States, and Mexico. The landmasses are rendered in warm, earthy tones of orange, brown, and tan, while the surrounding oceans and seas are depicted in various shades of blue and teal. The map has a soft, painterly texture with visible brushstrokes and blended colors.

WATER WITHOUT BORDERS?

Canada, the United States, and Shared Waters

Edited by Emma S. Norman, Alice Cohen, and Karen Bakker

Water Without Borders Canada The United States And Shared Waters

Hunter, Maureen

Water Without Borders Canada The United States And Shared Waters:

Water Without Borders? Emma S. Norman, Alice Cohen, Karen Bakker, 2013-01-01 Water without Borders is designed to help readers develop a balanced understanding of the most pressing shared water issues between Canada and the United States

Governing Transboundary Waters Emma S. Norman, 2014-11-27 Winner of the Political Geography Specialty Group's 2015 Julian Minghi Distinguished Book Award With almost the entire world's water basins crossing political borders of some kind understanding how to cooperate with one's neighbor is of global relevance For Indigenous communities whose traditional homelands may predate and challenge the current borders and whose relationship to water sources are linked to the protection of traditional lifeways or ways of life transboundary water governance is deeply political This book explores the nuances of transboundary water governance through an in depth examination of the Canada US border with an emphasis on the leadership of Indigenous actors First Nations and Native Americans The inclusion of this third sovereign in the discussion of Canada U S relations provides an important avenue to challenge borders as fixed both in terms of natural resource governance and citizenship and highlights the role of non state actors in charting new territory in water governance The volume widens the conversation to provide a rich analysis of the cultural politics of transboundary water governance In this context the book explores the issue of what makes a good upstream neighbor and analyzes the rescaling of transboundary water governance Through narrative the book explores how these governance mechanisms are linked to wider issues of environmental justice decolonization and self determination To highlight the changing patterns of water governance it focuses on six case studies that grapple with transboundary water issues at different scales and with different constructions of border politics from the Pacific coastline to the Great Lakes

Ecoregionalism Jon Marco Church, 2020-05-25 This book provides a comprehensive understanding of environmental regionalism at the international level analyzing the concept and identifying recurring patterns from six in depth case studies While ecoregions or environmental regions are defined on ecological boundaries rather than administrative criteria ecoregionalism is the idea that regional dynamics should cluster around ecoregions while ecoregionalization is the tendency of regional dynamics to cluster around ecoregions Focusing on the international level this book presents six cases of ecoregional processes from around the world and the regional environmental agreements two are terrestrial the Alps and the Andes two are marine the Mediterranean Sea and the Baltic Sea two are related to freshwater ecosystems the Amu Darya in Central Asia and the Great Lakes in North America The book analyzes both ecoregional processes focused on the environment as well as intersectoral ecoregional processes The case studies are analyzed based on the ecoregional governance framework developed by the author for this book Despite the diversity of context the similarity of the governance system of the six cases is striking Several recurring patterns have been identified which may also extend to the subnational level They are not design principles but may be taken into consideration for the design or redesign of current and future regional environmental agreements and

processes This book will be of great interest to students and scholars of environmental politics natural resource management spatial planning and international relations *Levelling the Lake* Jamie Benidickson, 2019-02-15 Stretching across Ontario Manitoba and Minnesota the Lake of the Woods and Rainy Lake basin spans boundaries and jurisdictions *Levelling the Lake* explores a century and a half of social economic and legal arrangements through which the resources and environment of the Lake of the Woods and Rainy Lake watershed have been harnessed and harmed Jamie Benidickson traces the environmental consequences of mining forest industries commercial fishing hydro electricity production and recreation as well as their often unanticipated impacts on local residents including Indigenous communities which encouraged new legal and institutional responses Assessing the transition from primary resource extraction toward sustainable development at a watershed level *Levelling the Lake* also shows how interjurisdictional and transboundary issues many involving the Canada US International Joint Commission continue to play a significant role throughout the region **Transboundary Environmental**

Governance across the World's Longest Border Stephen Brooks, Andrea Olive, 2018-07-01 Canada and the United States share a border that spans several of the world's major watersheds and encompasses the largest reserves of fresh water on the planet The border that separates these two neighbors is political but the natural environment is a matter of common concern In recent years dramatic changes have taken place in the political and environmental landscapes that shape the conversations possibilities and processes associated with the management of this shared interest More than ever Indigenous populations are recognized to be a necessary part of negotiations and decision making regarding matters ranging from pipelines to the protection of endangered species habitats Globalization and in particular the continuing elaboration of a transnational conversation and architecture for addressing issues related to climate change have ramifications for Canada US transboundary issues The contributors to this volume examine the state of the existing transboundary relationship between Canada and the United States including the governance structures and processes the environmental impacts and adequacy of these structures and processes and the opportunities and obstacles that exist for reform and improved outcomes

Three Plays of Maureen Hunter Hunter, Maureen, 2003 Book is clean and tight No writing in text Like New *The Canadian Environment in Political Context, Second Edition* Andrea Olive, 2019-08-20 *The Canadian Environment in Political Context* uses a non technical approach to introduce environmental politics to undergraduate readers The second edition features expanded chapters on wildlife water pollution land and energy Beginning with a brief synopsis of environmental quality across Canada the text moves on to examine political institutions and policymaking the history of environmentalism in Canada and other crucial issues including Indigenous peoples and the environment as well as Canada's North Enhanced with case studies key words and a comprehensive glossary Olive's book addresses the major environmental concerns and challenges that Canada faces in the twenty first century Leaky Governance Kathryn Furlong, 2016-01-15 Municipalities around the world face important water supply challenges One response has been alternative service delivery ASD For its

proponents ASD is a way to have independence from municipal government without relinquishing control over the utility for its detractors it is privatization under another name Yet the organizational barriers offered by ASD are at best leaky Deeply interdependent both water management and municipal governance must be strengthened to meet contemporary water supply needs Leaky Governance explores ASD s relation to neoliberalization water supply and local governance Using Ontario as a case study Kathryn Furlong paints a complex picture of both ASD and municipal government She examines organizational models for water supply and how they are affected by shifting governance and institutional environments Leaky Governance addresses increasingly pressing environmental political and social issues surrounding water supply and their relationship to urban governance and economics as well as to broader issues in public policy **Green-lite** G. Bruce Doern, Graeme Auld, Christopher Stoney, 2015-10-30 An in depth study of Canadian environmental policy *Research Handbook on Flood Risk Management* Jessica Lamond, David Proverbs, Namrata Bhattacharya Mis, 2024-04-12 Pushing the boundaries of flood risk management research this comprehensive Research Handbook presents pragmatic insights into all areas relating to flood risk Through its use of dynamic and people centred paradigms it explores urban flood management within localities properties neighbourhoods and cities

Unveiling the Magic of Words: A Overview of "**Water Without Borders Canada The United States And Shared Waters**"

In a global defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their power to kindle emotions, provoke contemplation, and ignite transformative change is truly awe-inspiring. Enter the realm of "**Water Without Borders Canada The United States And Shared Waters**," a mesmerizing literary masterpiece penned by way of a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve in to the book is central themes, examine its distinctive writing style, and assess its profound impact on the souls of its readers.
